

**Master in Planning and
Management of Tourism Systems**

Virtual Reality & Augmented Reality

Nicola Cortesi

SHORT RECAP OF THE FIRST 3 LESSONS

1. Overview of the IT that mostly influence the Tourism Sector
2. Impact of AI on the Tourism Sector and on the job market
3. Video Generators and the 3 skills to develop:
 - Networking skills
 - AI skill
 - Question everything

INTRO

(VR)
VIRTUAL REALITY

(AR)
AUGMENTED REALITY

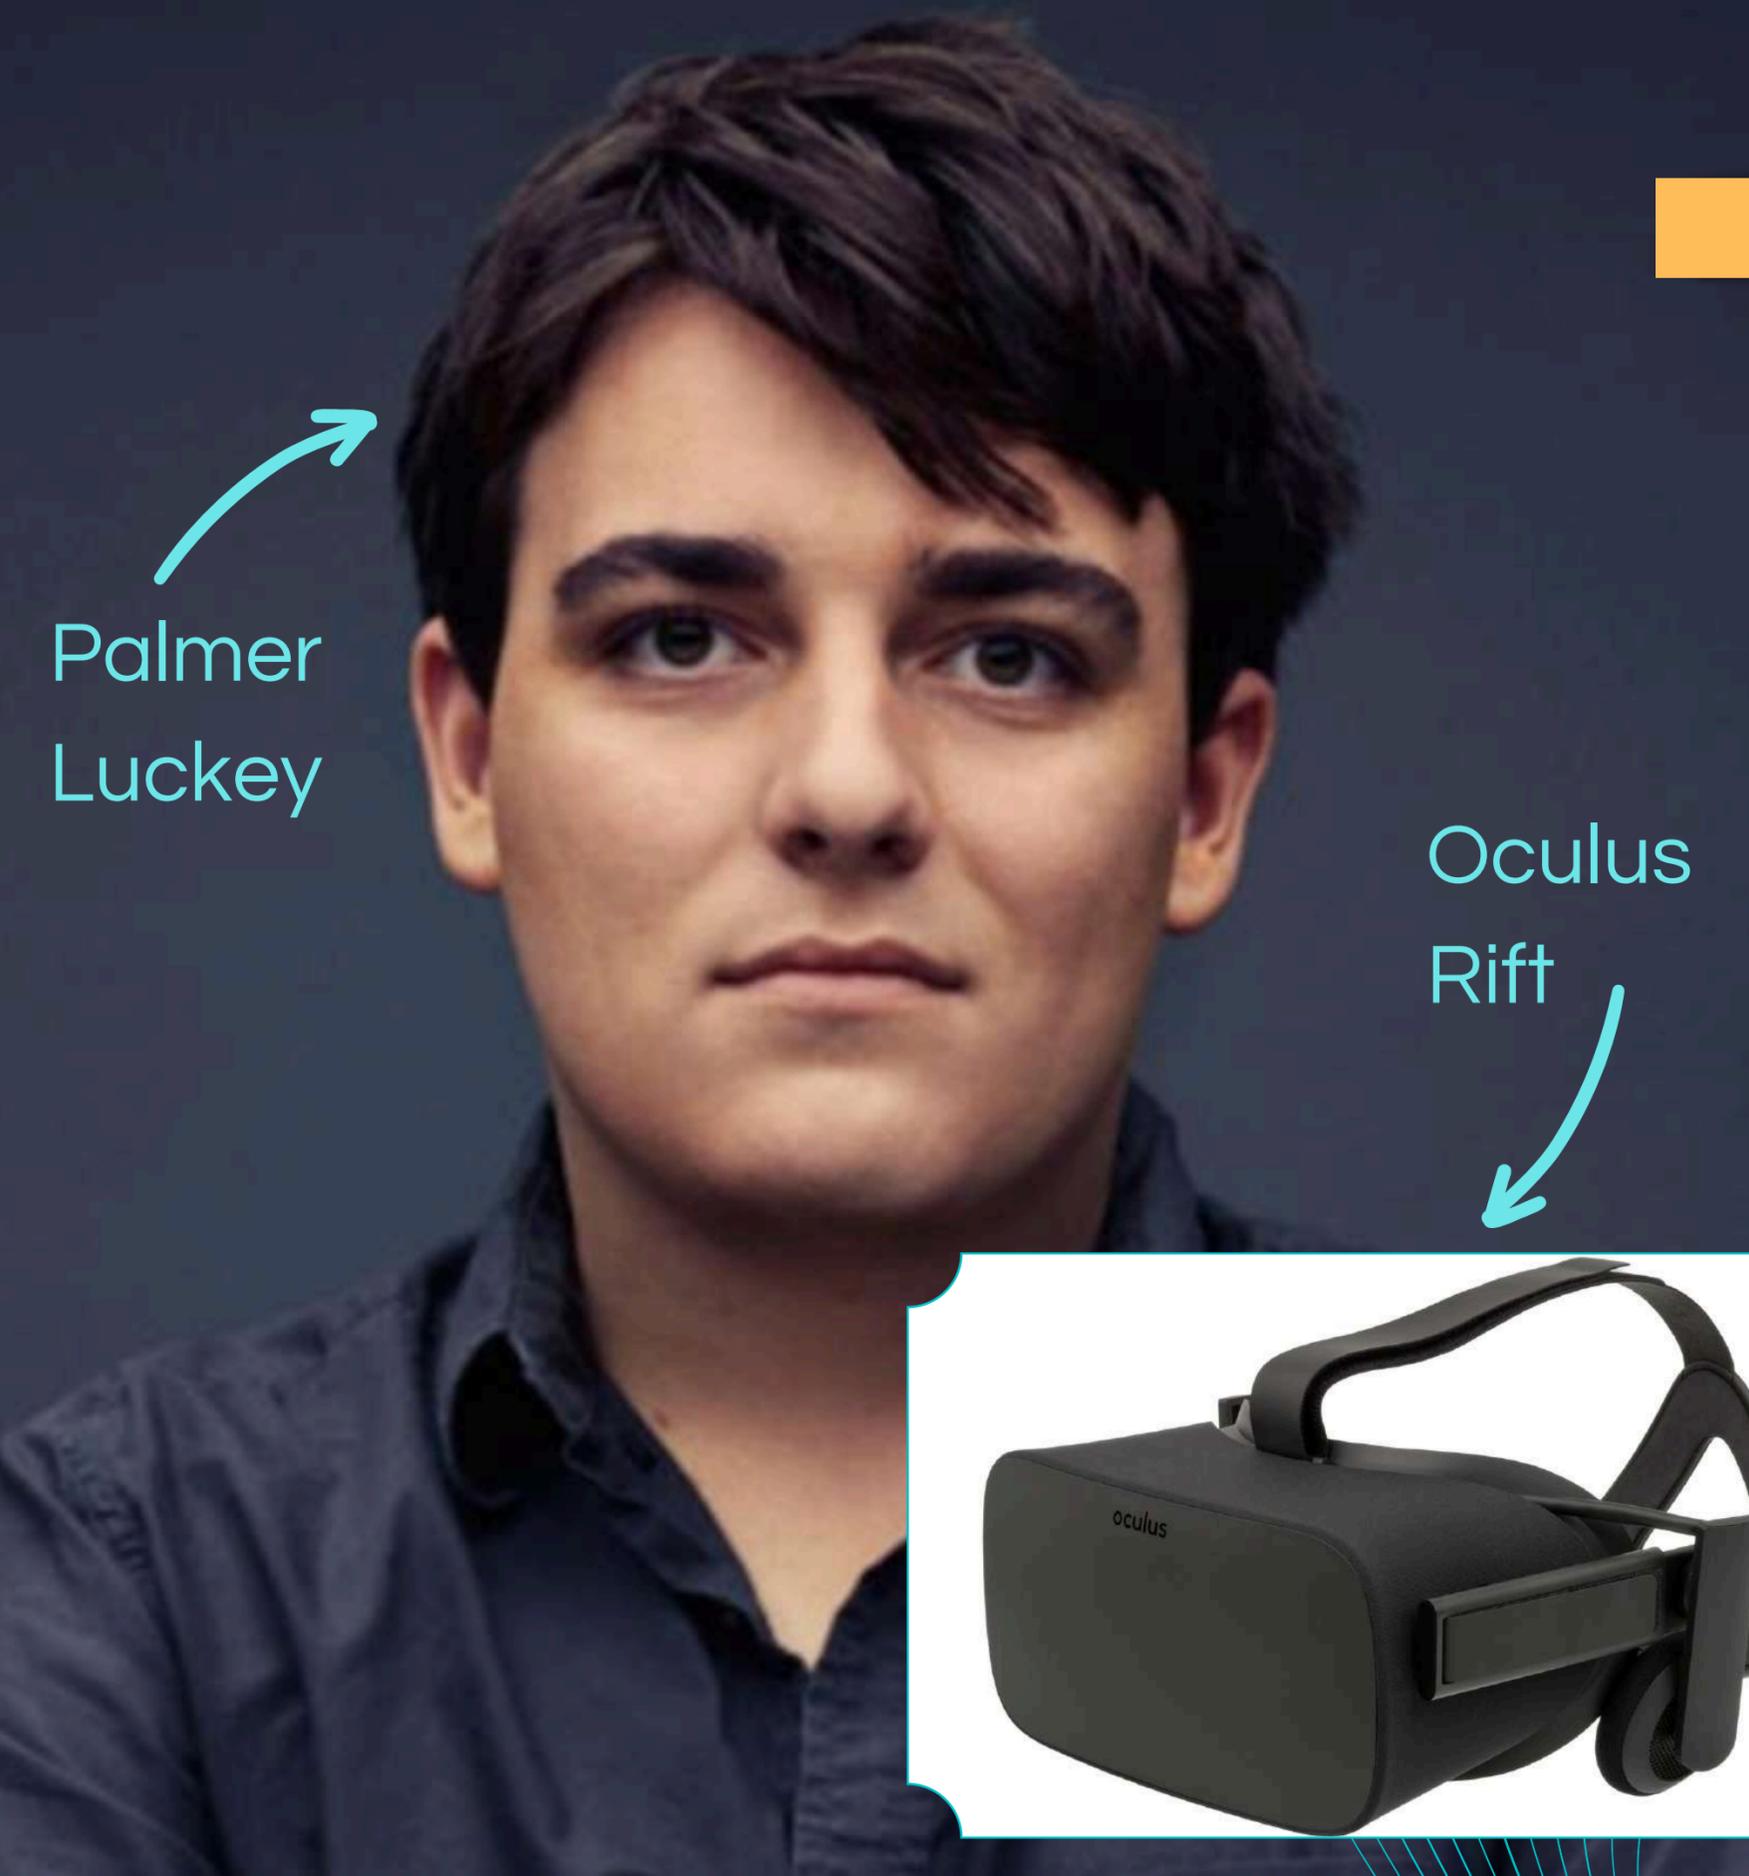

VR and AR were not devised with tourism in mind

INTRO

in 1990s SEGA, Nintendo and other videogame companies released to the market the first VR headsets, but technology was not mature yet

INTRO

Palmer
Luckey

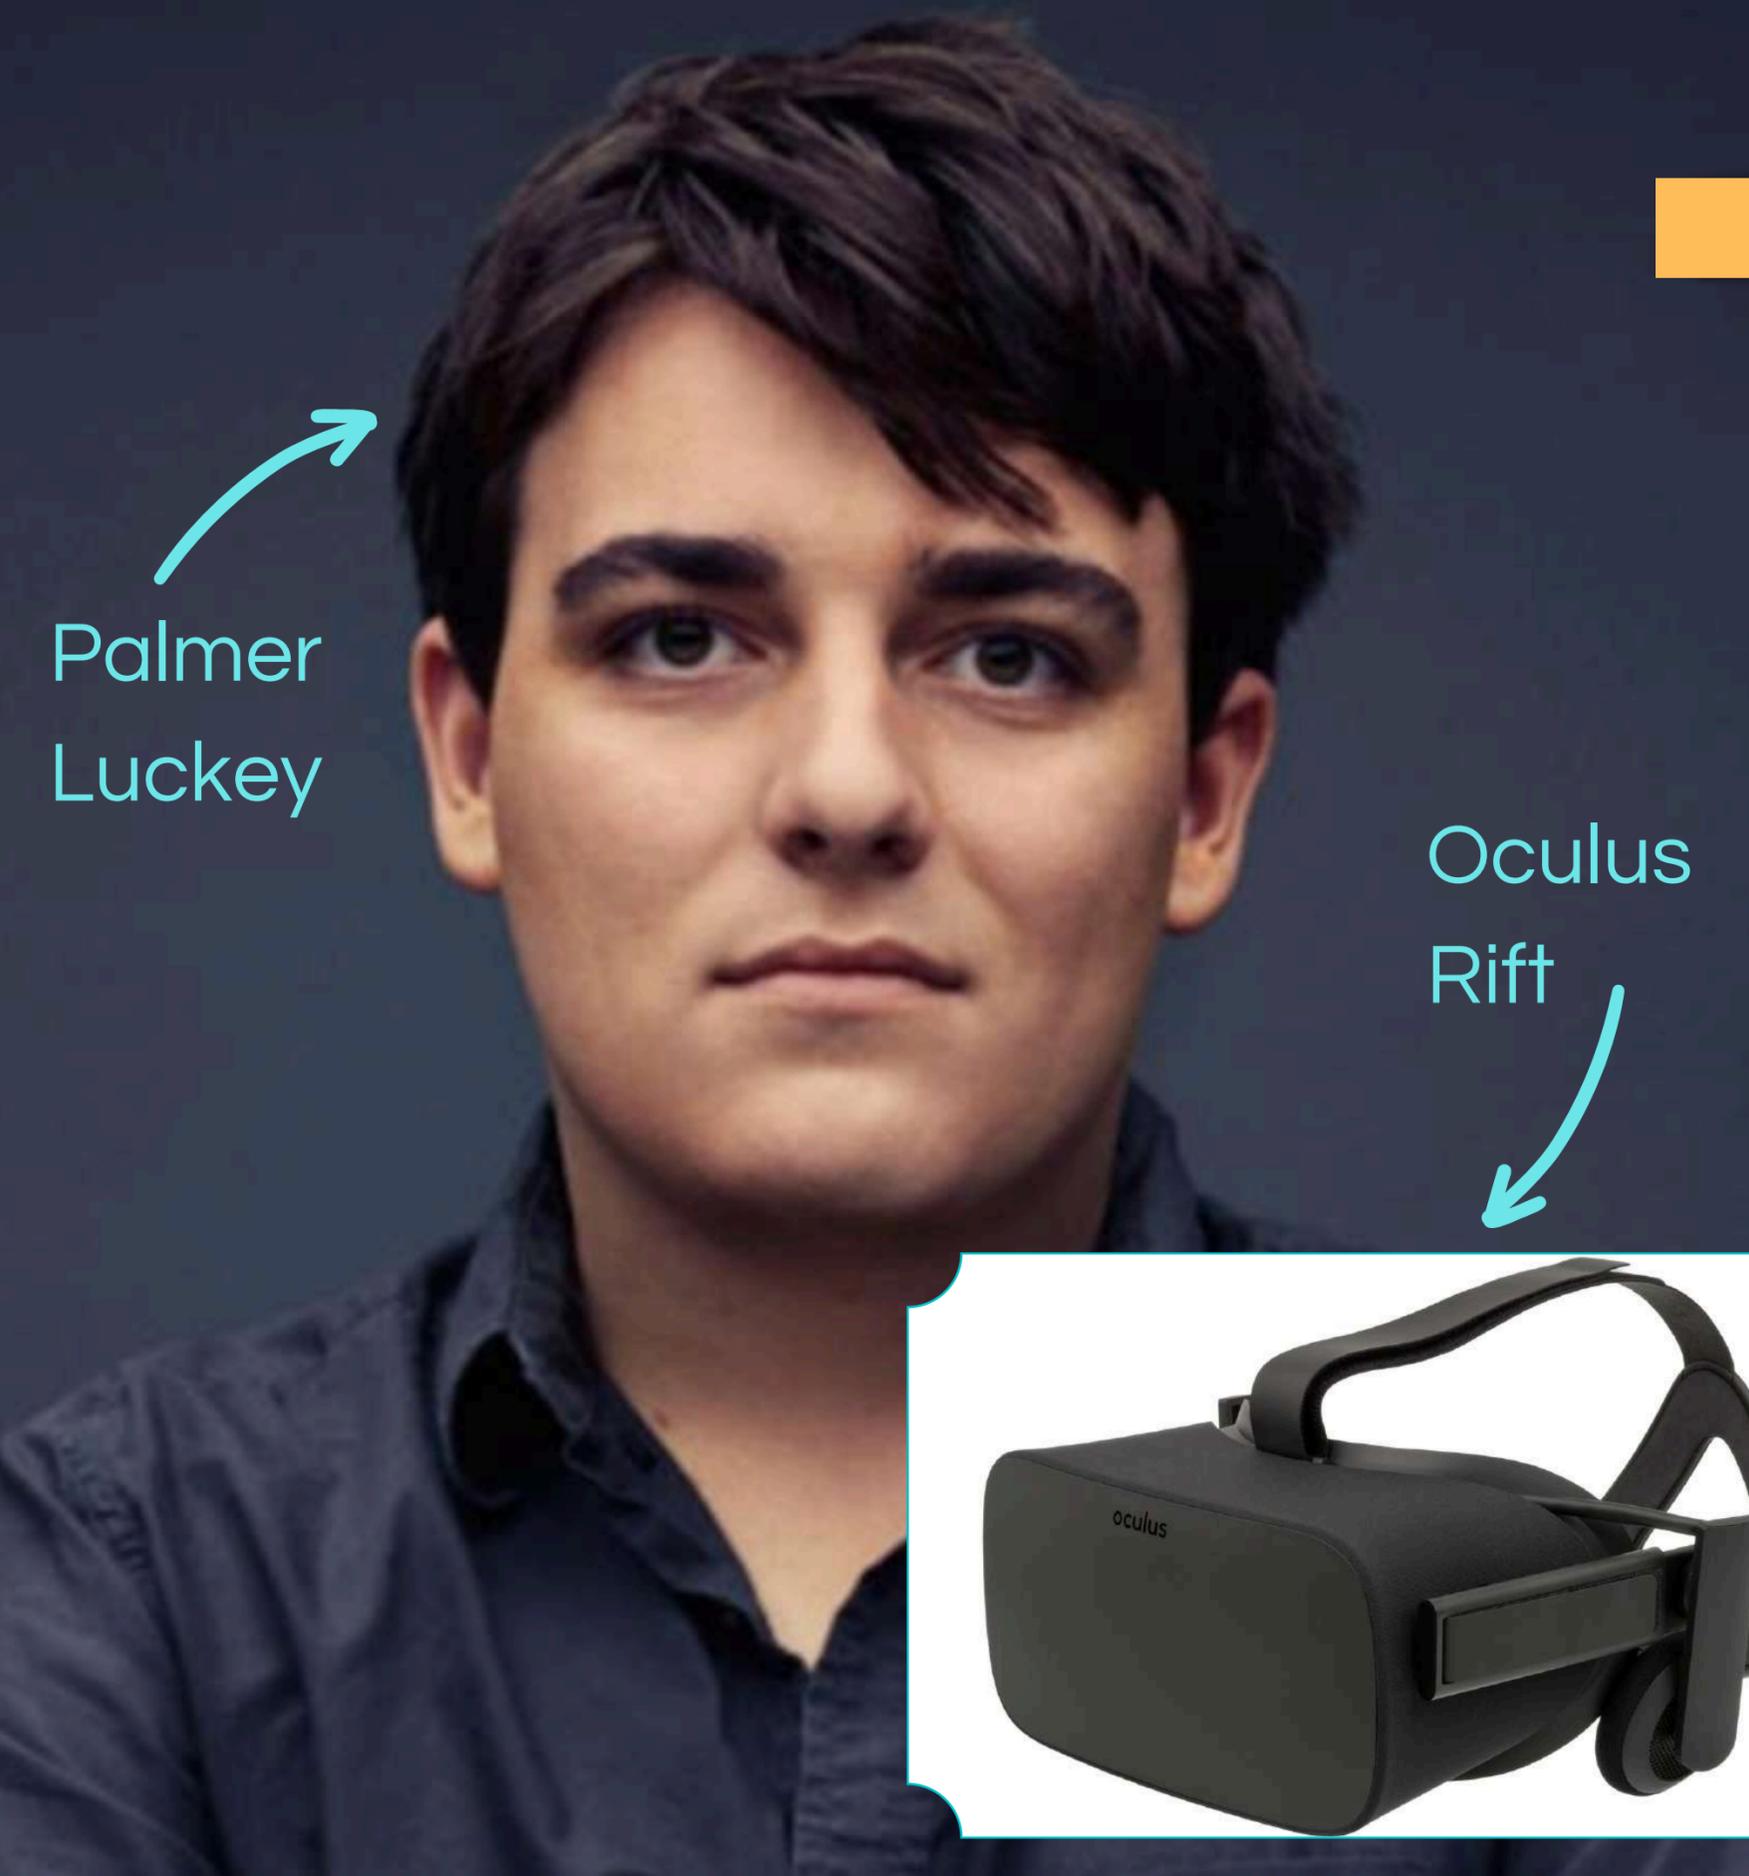

Oculus
Rift

VR was abandoned until 2010, when Palmer Luckey, an American teenager, built in his garage the Oculus Rift, the first modern VR headset

INTRO

Palmer
Lucky

Oculus
Rift

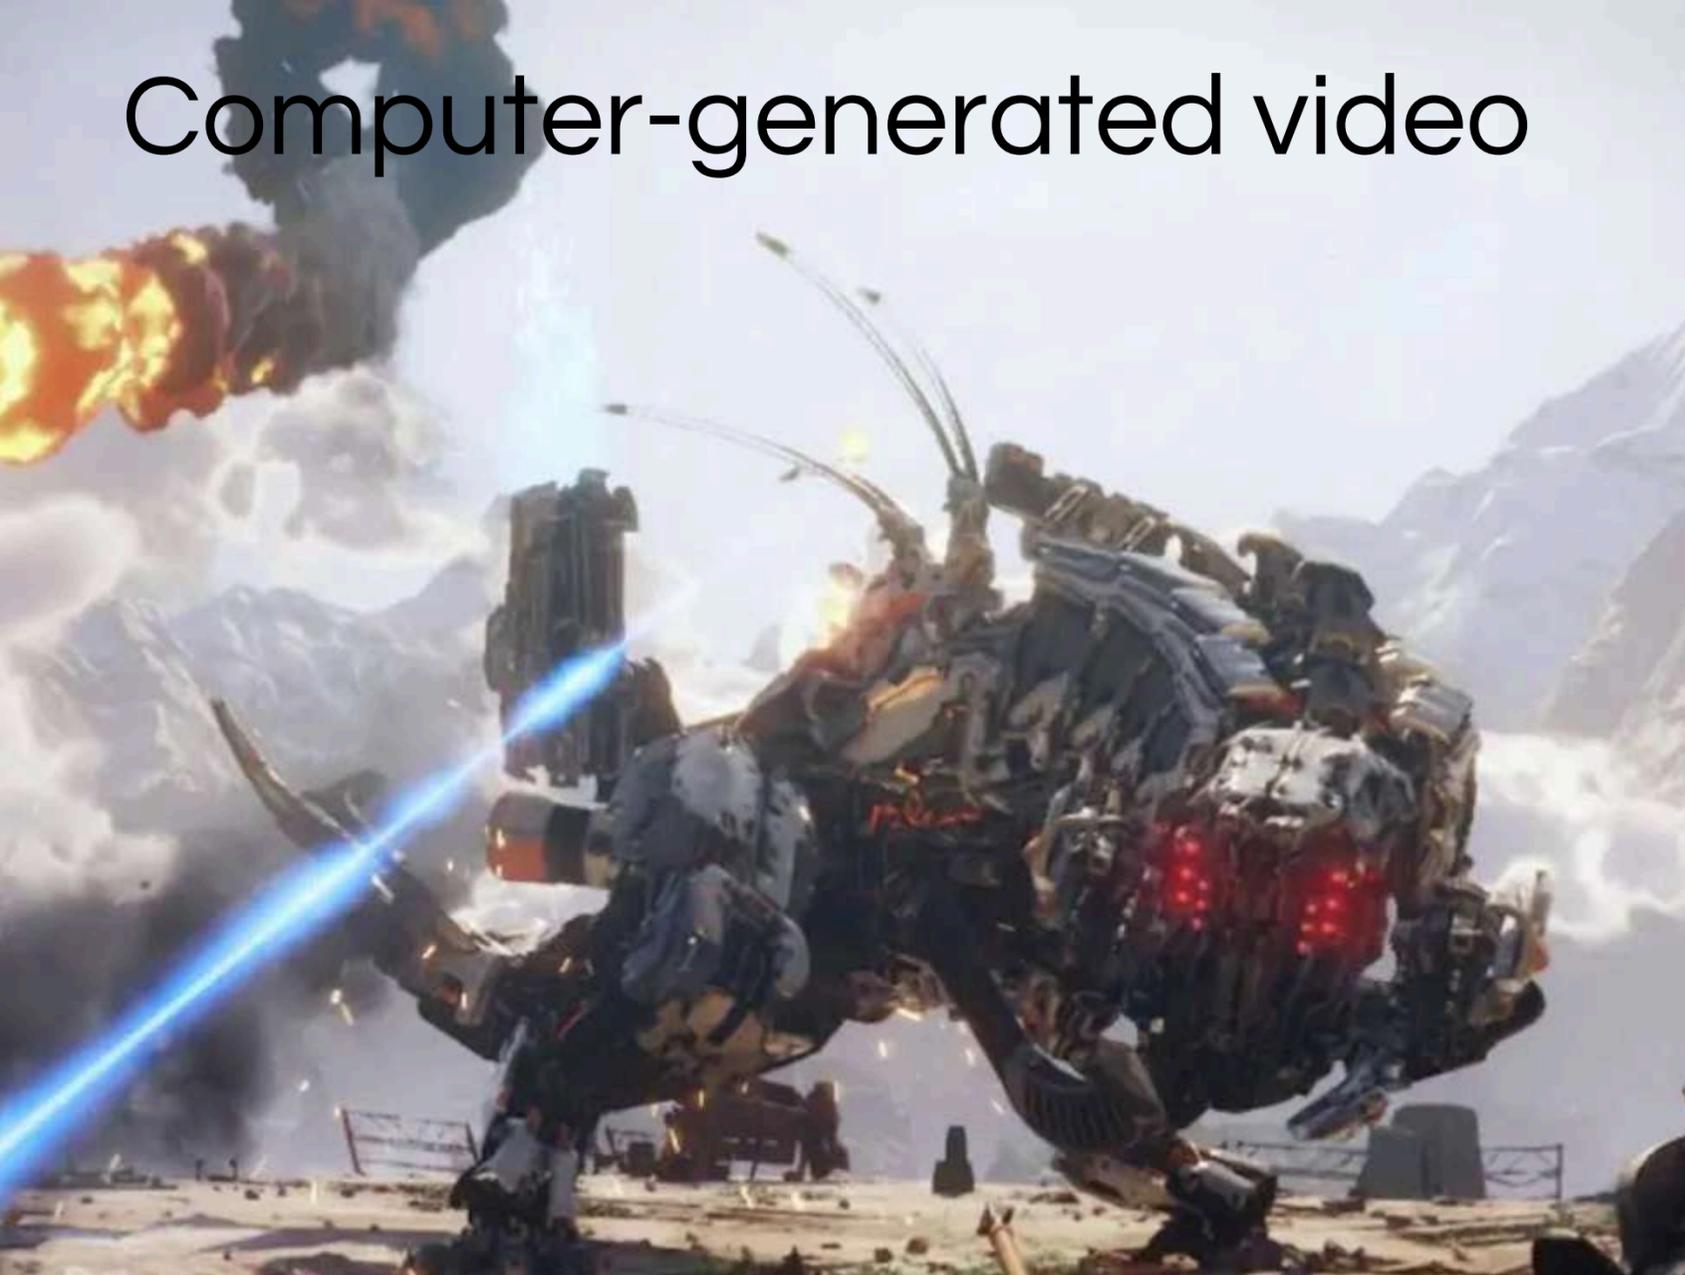

He sold it through a
Kickstarter campaign
that raised \$2.4 millions
and founded company
Oculus, that Facebook
acquired in 2014 for \$3
billions

The movie *Avatar* (2009), directed by James Cameron, revolutionized modern 3D cinema and demonstrated how *immersive* VR can be

Computer-generated video

Real-world simulation

There are two different types of VR videos: the first one employs computer generated imagery (e.g: VR games); the second one simulates the real world instead and is called 360 VR

There are three types of headsets: mobile headsets which combine a smartphone with a mount

A close-up photograph of a man wearing a grey VR headset. He has a wide, joyful smile, showing his teeth. The background is a blurred indoor setting with warm, bokeh-style lights. A dark blue rounded rectangle is overlaid at the bottom of the image, containing white text.

...Tethered headsets are just a display controlled by another device, like a PC or a video game console

...and **standalone headsets** that have all necessary components to provide virtual reality experiences integrated into the headset.

Meta Quest 3

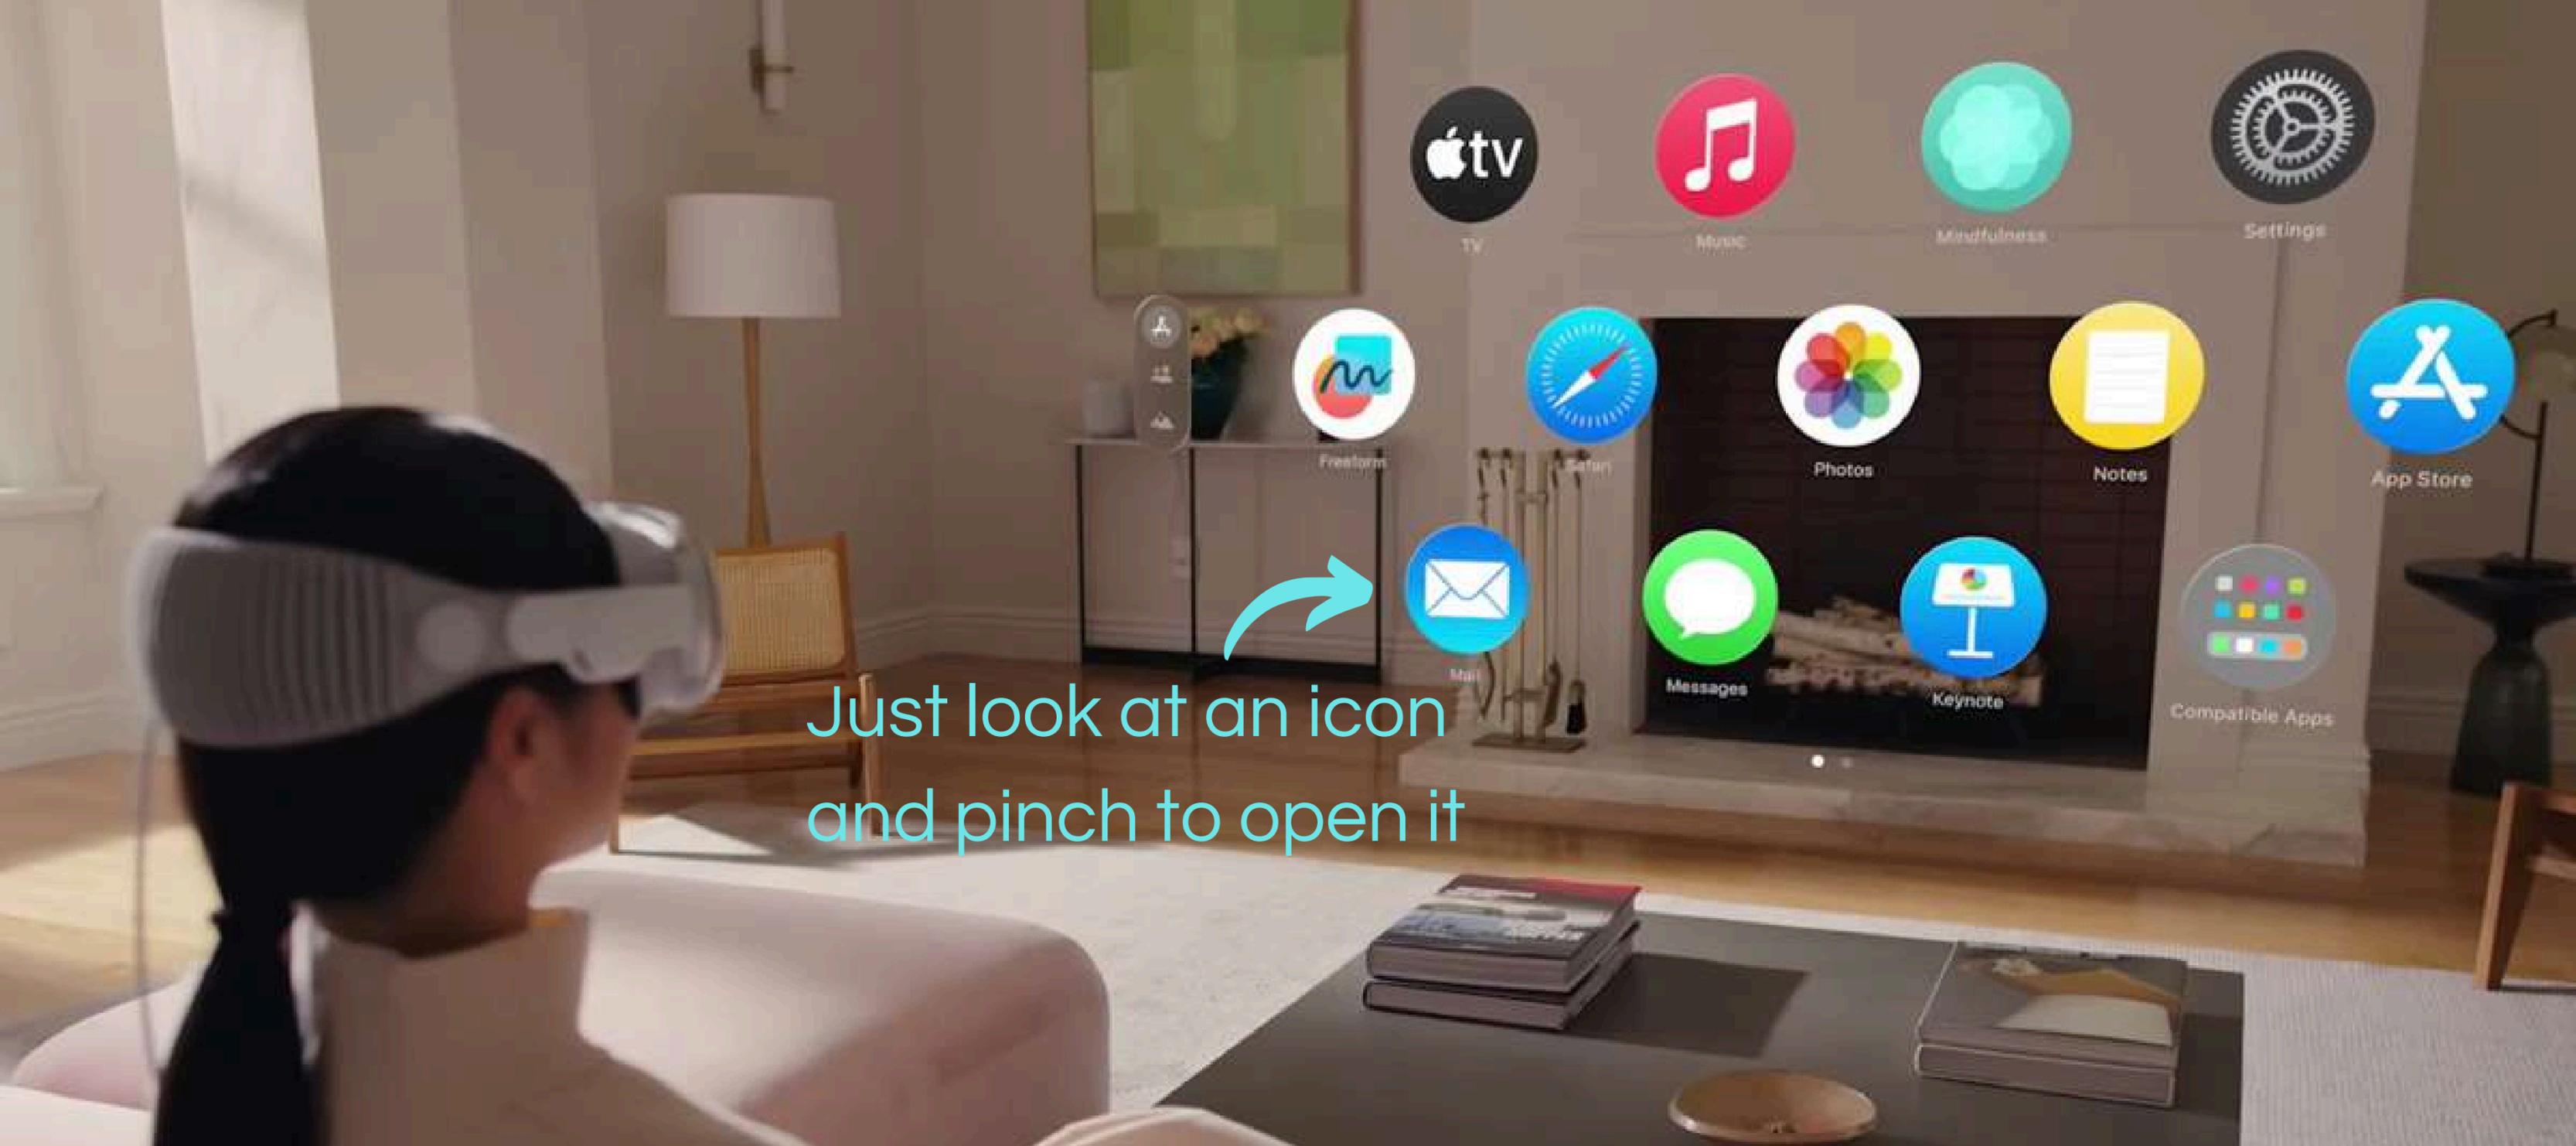

Sony PS VR2

The most popular headsets in 2025 are the [Meta Quest 3](#) (standalone) and the [Sony Playstation VR2](#) (tethered)

Apple released its Apple Vision Pro, that combines both VR and AR: "Mixed Reality"

Just look at an icon
and pinch to open it

Its eye tracking system allows to replace mouse click with the pinching of the index finger and thumb together

VR TOURIST VIDEOS

There are two types of 360 VR videos/photo for tourism:

- Monoscopic
- Stereoscopic

A woman is shown from the chest up, wearing a black VR headset and holding it with both hands. She has a joyful expression, with her mouth open as if laughing or speaking. The background is a vibrant, tropical beach scene with palm trees, a sandy shore, and turquoise water under a blue sky with soft, colorful clouds. The scene is presented in a stereoscopic format, typical of VR content.

Stereoscopic VR tourist videos only works for VR headsets and feature head tracking, so the tourists can move their head to explore the surroundings in a more realistic way

Monoscopic VR tourist videos/photo work much like a normal video: they can be viewed on smartphones and PC too. The viewer can click and drag the mouse on the screen to rotate the field of view, similar to turning the head to explore a scene (e.g: [Google Street View](#))

AirPano VR specializes in virtual tours of the most beautiful places of the world, e.g: Angel Falls in Venezuela

https://www.youtube.com/watch?v=L_tqK4eqelA

VR IMPACT ON TOURISM

There are three main types of applications of VR to the tourism sector:

- VR travel experiences
- VR for travel agencies
- Virtual hotel tours

A woman is shown wearing a VR headset, looking up with an open mouth and a joyful expression. The background is a vibrant, virtual landscape with blue water, green mountains, and a bright sky. The woman is wearing a denim jacket.

VR travel experiences are stereoscopic VR tourism videos that create the same feelings and emotions of being in the real destination, giving users a taste of what it's like to be there

A man with a beard is wearing a black VR headset with a yellow heart logo and the text "Thomas Cook" on the front. He is also wearing white headphones. In the background, a woman with long blonde hair is sitting at a desk, looking towards the camera. The setting appears to be a travel agency or office, with a computer monitor and framed pictures on the wall. The background image is slightly blurred.

VR for travel agencies replaces classic brochures and screens inside the travel agencies, to offer prospective clients short video clips of virtual travel experiences instead

Virtual hotel tours are usually monoscopic VR tourism videos that allow users to explore a hotel with a 360° interactive tour in which the users can choose which rooms to explore

Examples

Thomas Cook Airlines offers touristic helicopter flights over Manhattan. Their bookings tripled when they created a VR tour using 360° recordings of their helicopter flights

Both British Museum and Louvre offer virtual tours

<https://www.britishmuseum.org/blog/how-explore-british-museum-home>

In Milan there was an exposition where visitors enter into the paintings of Van Gogh using AI-powered VR

<https://vangoghexpo.com/milano/>

AI is able to simulate **Van Gogh's style** to fill the room (physical or virtual) with every changing painting

<https://vangoghexpo.com/milano/>

Sandy Lane Hotel, Barbados

<https://www.youtube.com/watch?v=Lbq6lQgHhKM&t=181s>

A guided virtual city tour of London

<https://www.youtube.com/watch?v=m9ECIKKA1VeQ>

360°

National Geographic made underwater VR videos

<https://www.youtube.com/watch?v=v64KOxKVLVg&t=51s>

A woman with long blonde hair, wearing a straw hat and a brown backpack, is seen from behind, looking out over a virtual Parisian landscape. The scene includes the Eiffel Tower, a river, and snow-capped mountains under a blue sky with white clouds. A stylized VR headset icon is overlaid on the woman's head.

TriptoVR

TriptoVR is an app for MetaQuest to visit famous destinations

<https://www.youtube.com/watch?v=6xOPX0CIJRI>

Woorld is a VR MetaQuest app to travel the world with your friends

<https://www.youtube.com/watch?v=2Q-PpuPEqY0>

VR ADVANTAGES

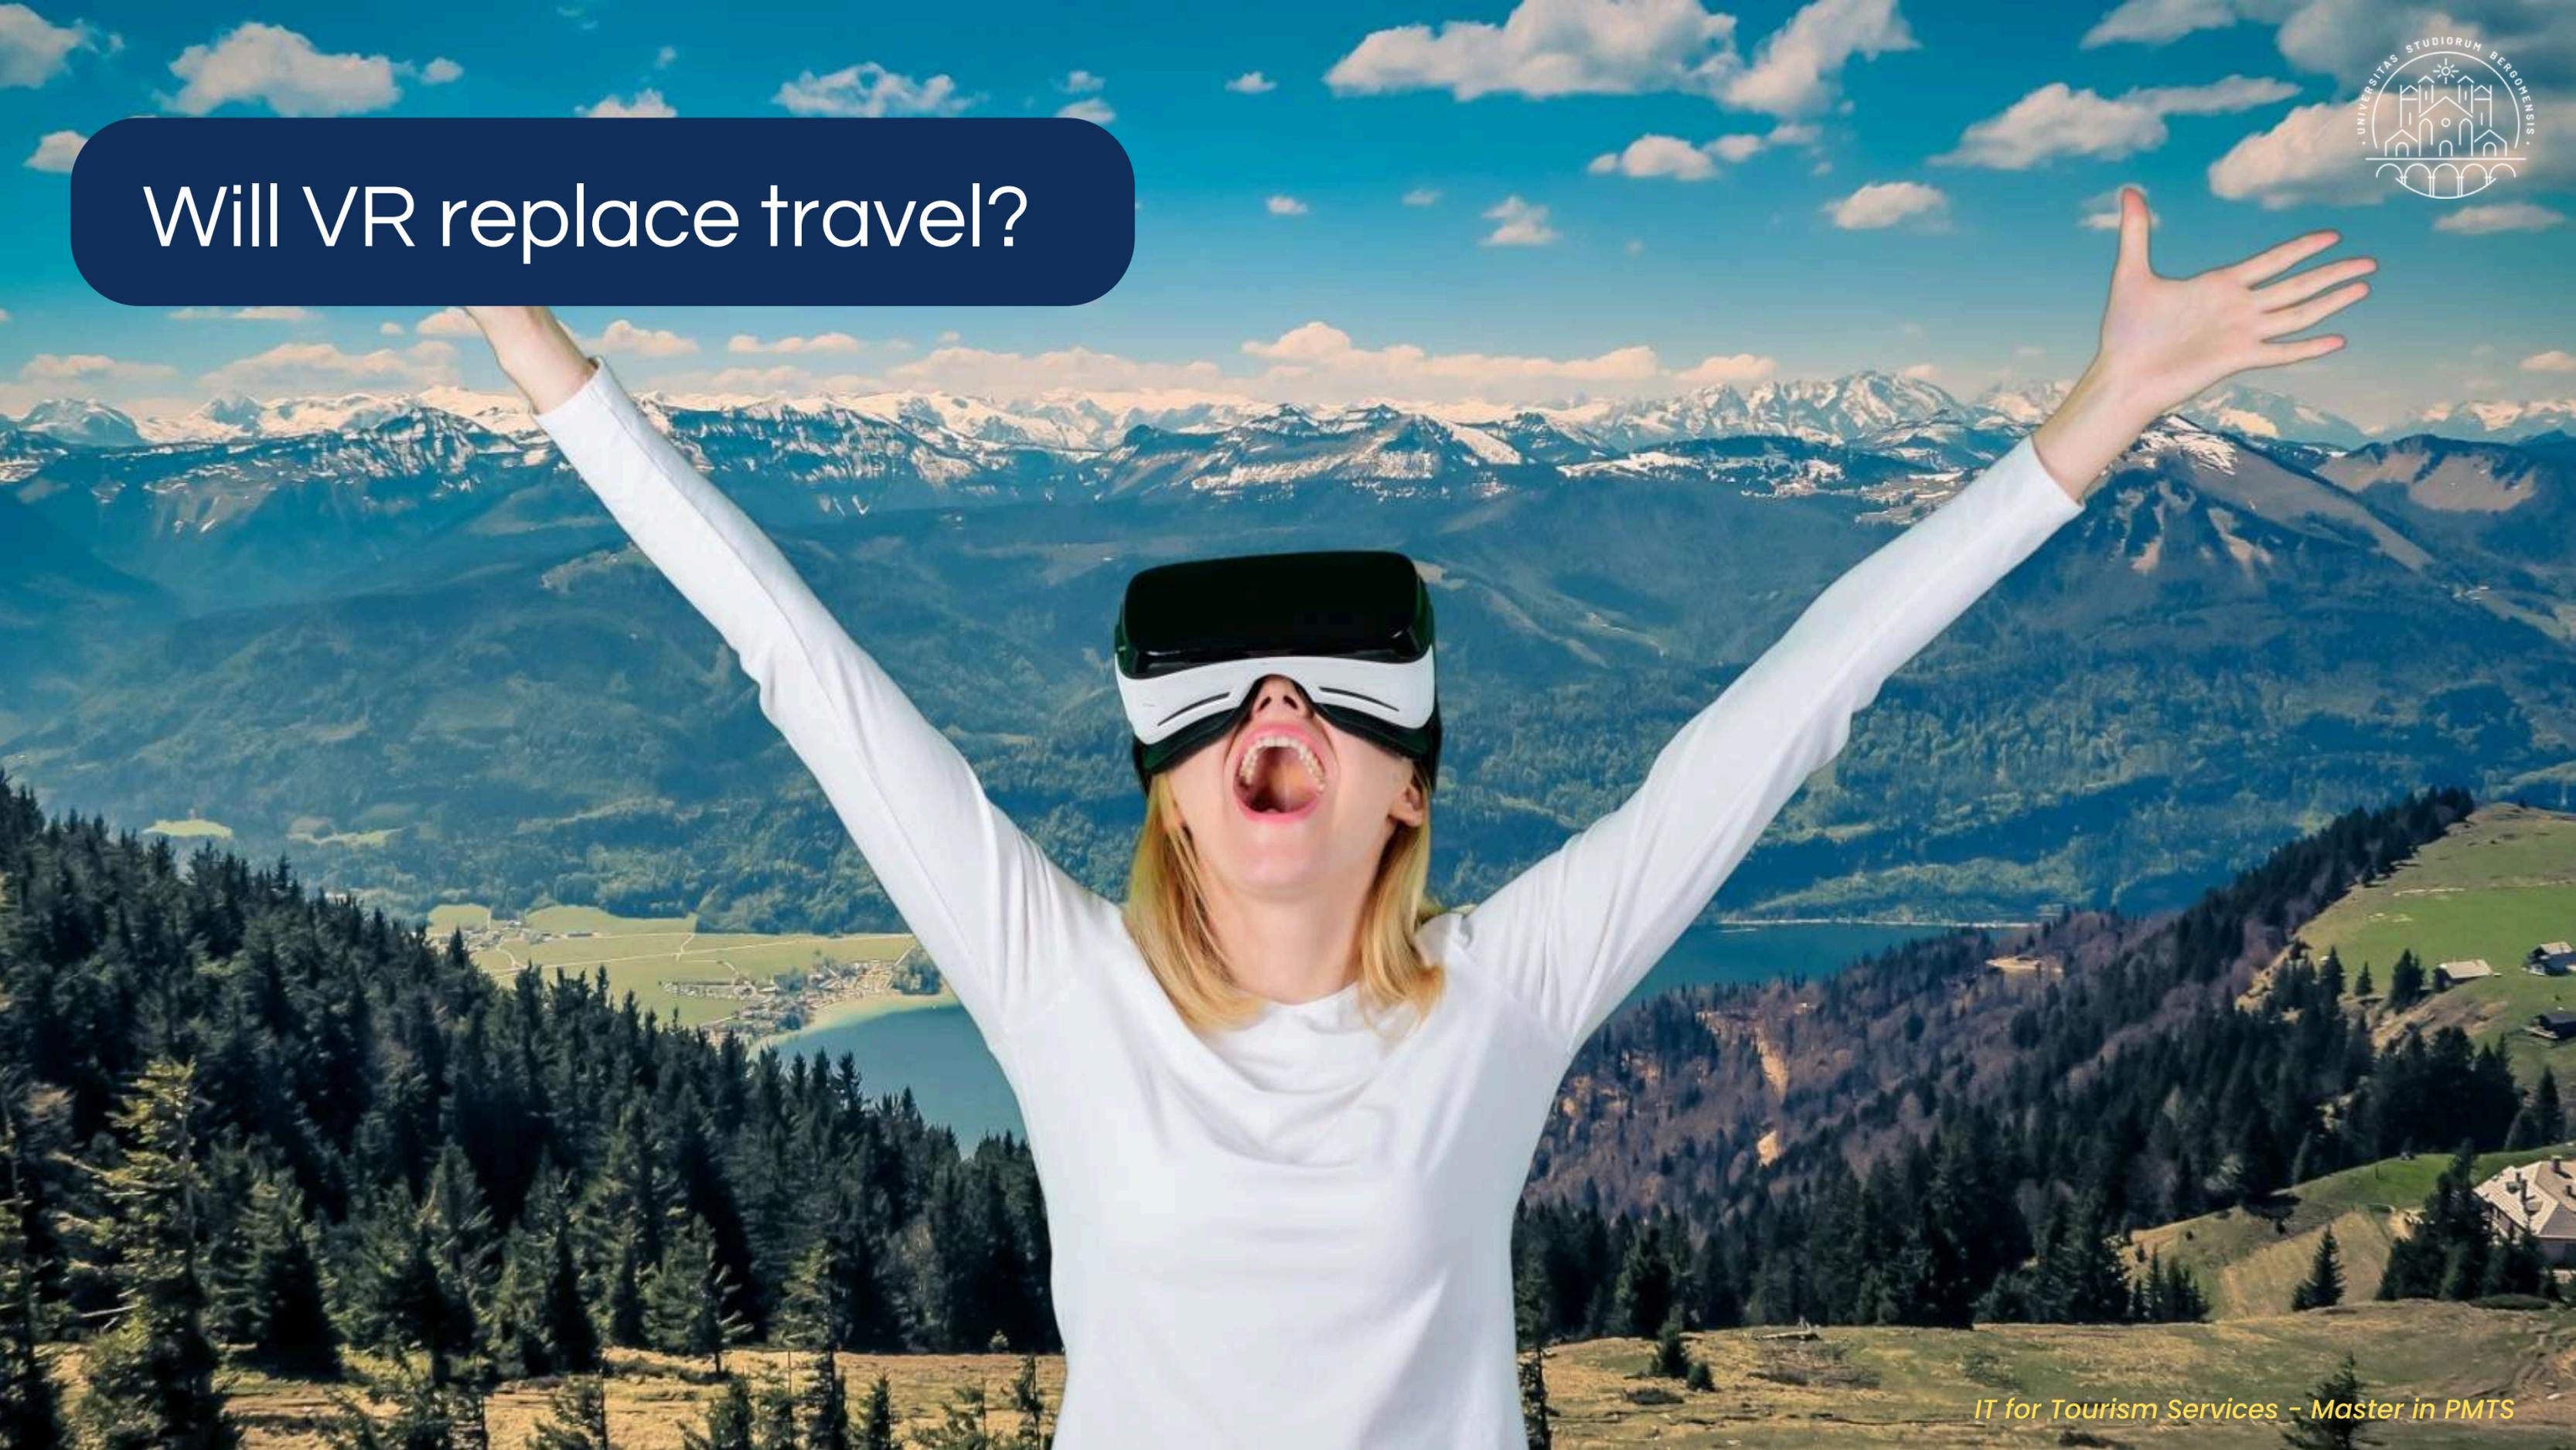

- Try before you buy approach
- Make tourists think about travelling to places that they wouldn't have considered otherwise
- Reduce overtourism by simulating visit to vulnerable destinations
- Inclusive tourism: provide travel experiences to those who cannot travel (even old or sick people)
- Allow new travel companies to stand out from the crowd

Beyond the high cost, VR has some issues to solve before becoming mainstream: motion sickness, eye stress, lack of vision of the surroundings

Will VR replace travel?

Will VR replace travel?

80% of people said **no**

90% said that visiting a destination in VR is **not the same** as in real life

70% cited **tasting local food** as being important to them

Will VR replace travel?

80% of people said **no**

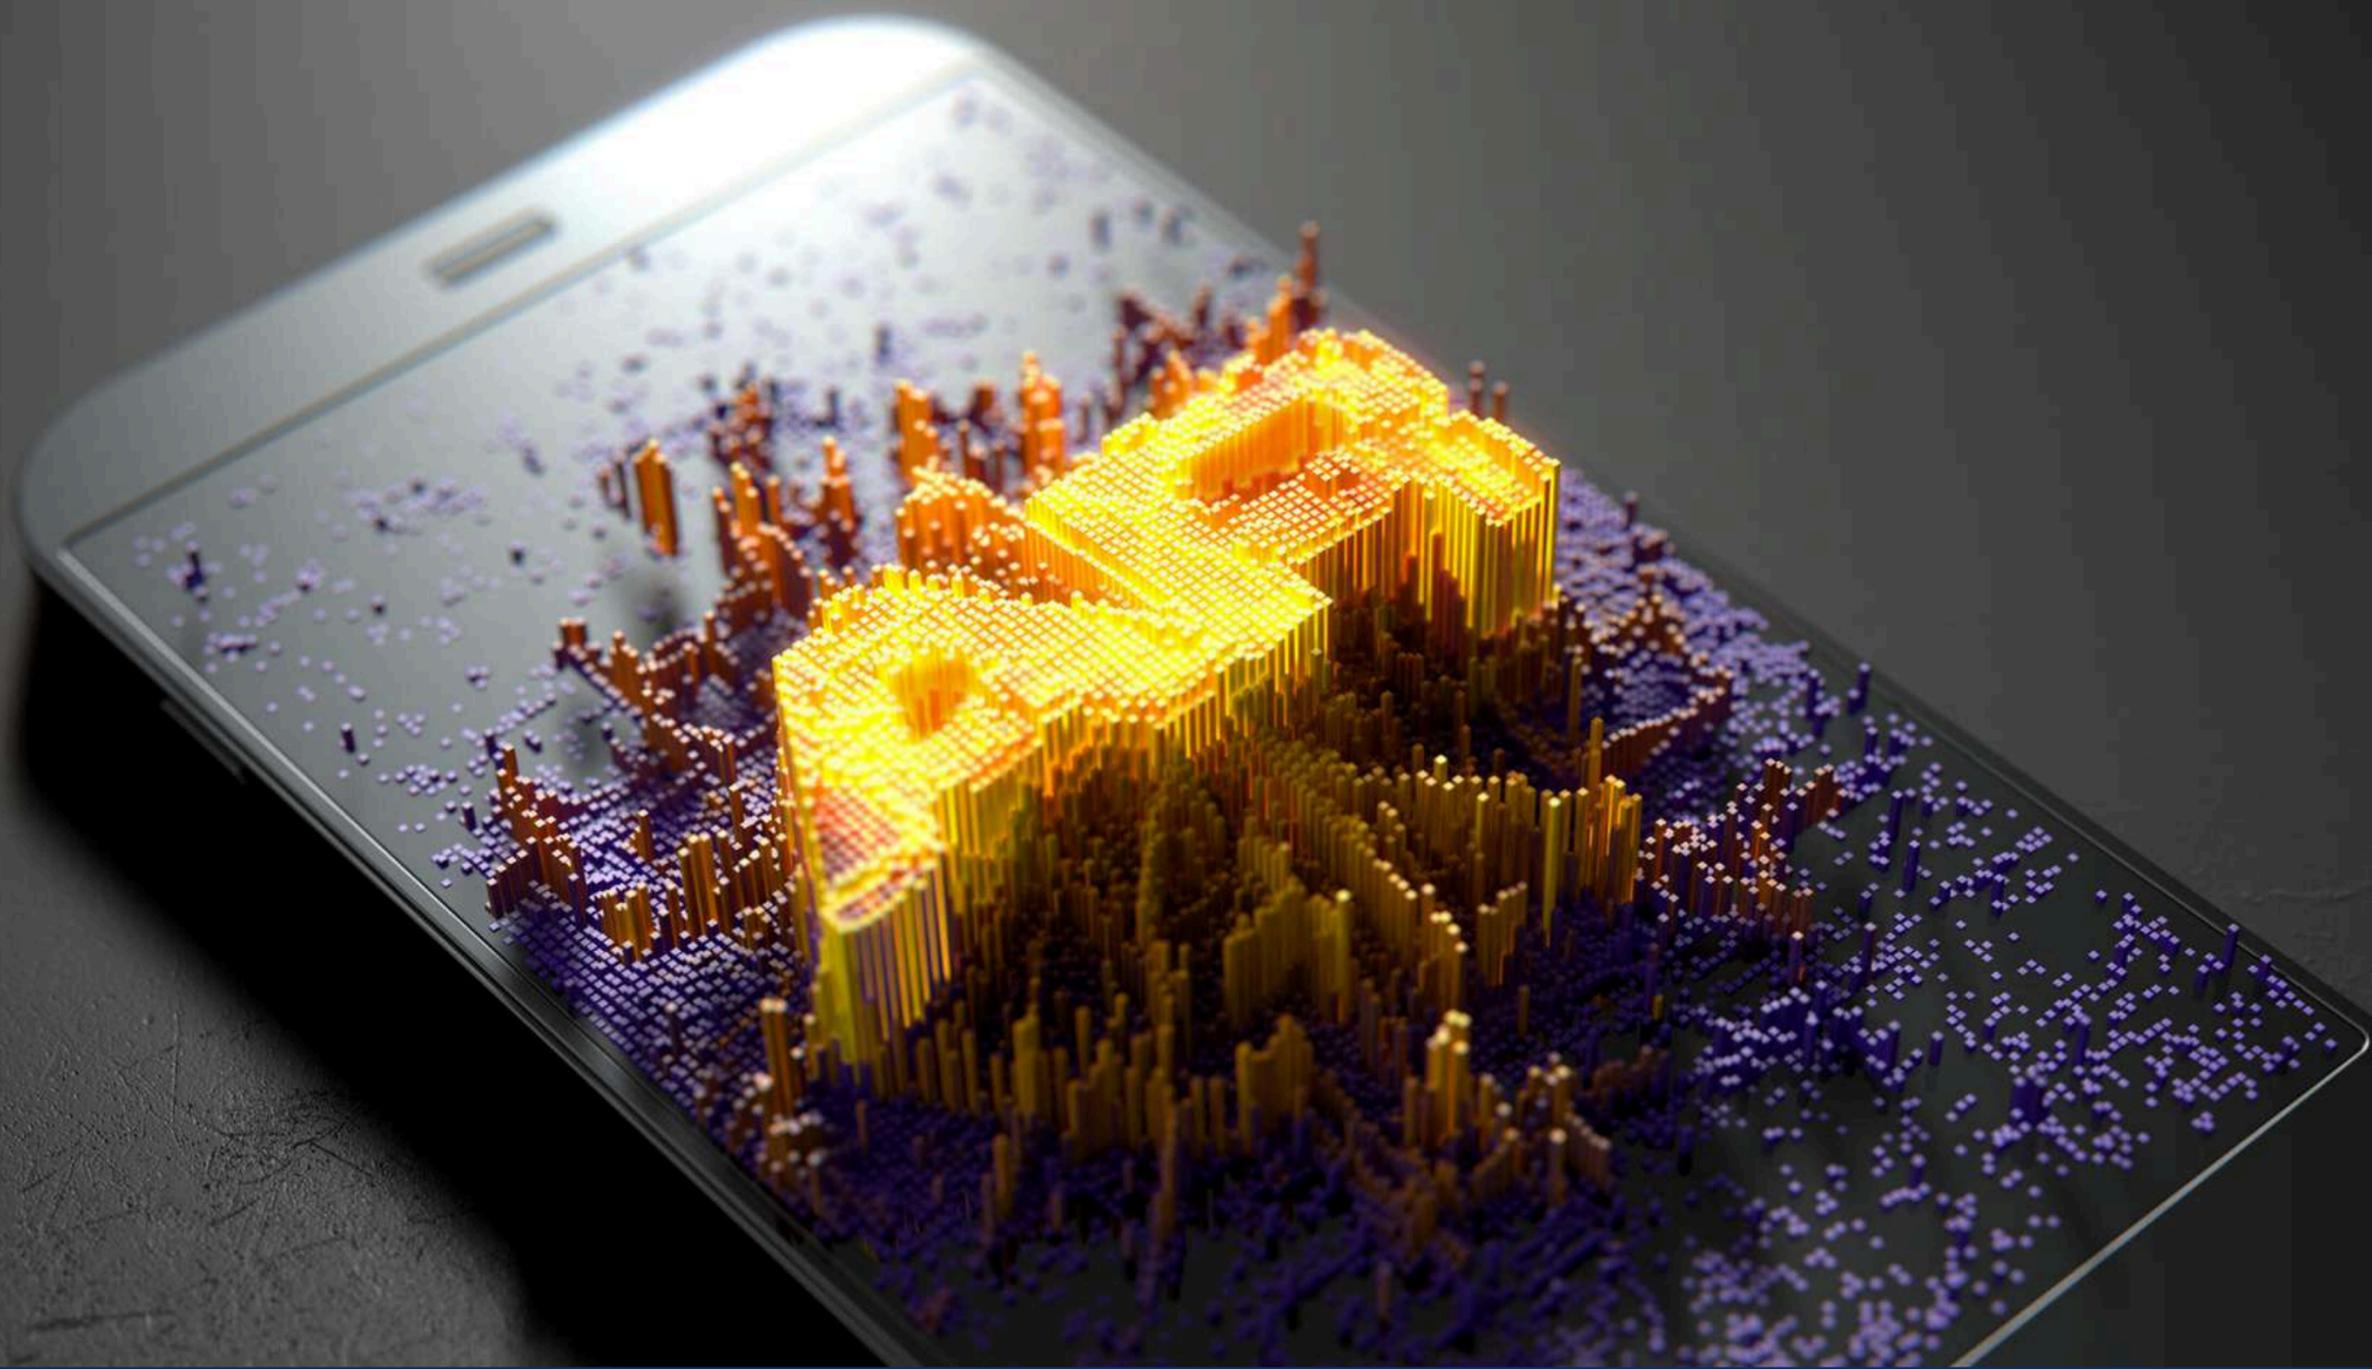

90% said that visiting a destination in VR is **not the same** as in real life

70% cited **tasting local food** as being important to them

It's pretty safe to assume that **VR won't replace travel** anytime soon.
It is just a useful tool for **marketing**

Imagine combining **Genie3** world model (see lesson 3) with VR: you could create a **whole VR world** from a **single photo**!

AUGMENTED REALITY

AR is an example of **disrupting technology**: an innovation that 15 years ago did not exist, that **no one expected**, but it quickly become **mainstream**

AR consists in overlapping digital content over images or video of the real world thanks to sensors that track the position and orientation of the device (e.g: GPS, compass)

All it takes to access an AR system is a device with **GPS**, **webcam** and **internet connection** (standard in every smartphone, tablet or PC): AR is **within the reach of all**

AR was made popular in 2016 by the game **Pokemon GO**. Its app was downloaded a **billion times**

Pikachu

An ancient gate of **Seoul** was **rebuilt virtually** with AR. Physically it'd have been impossible, as the city grew around it.

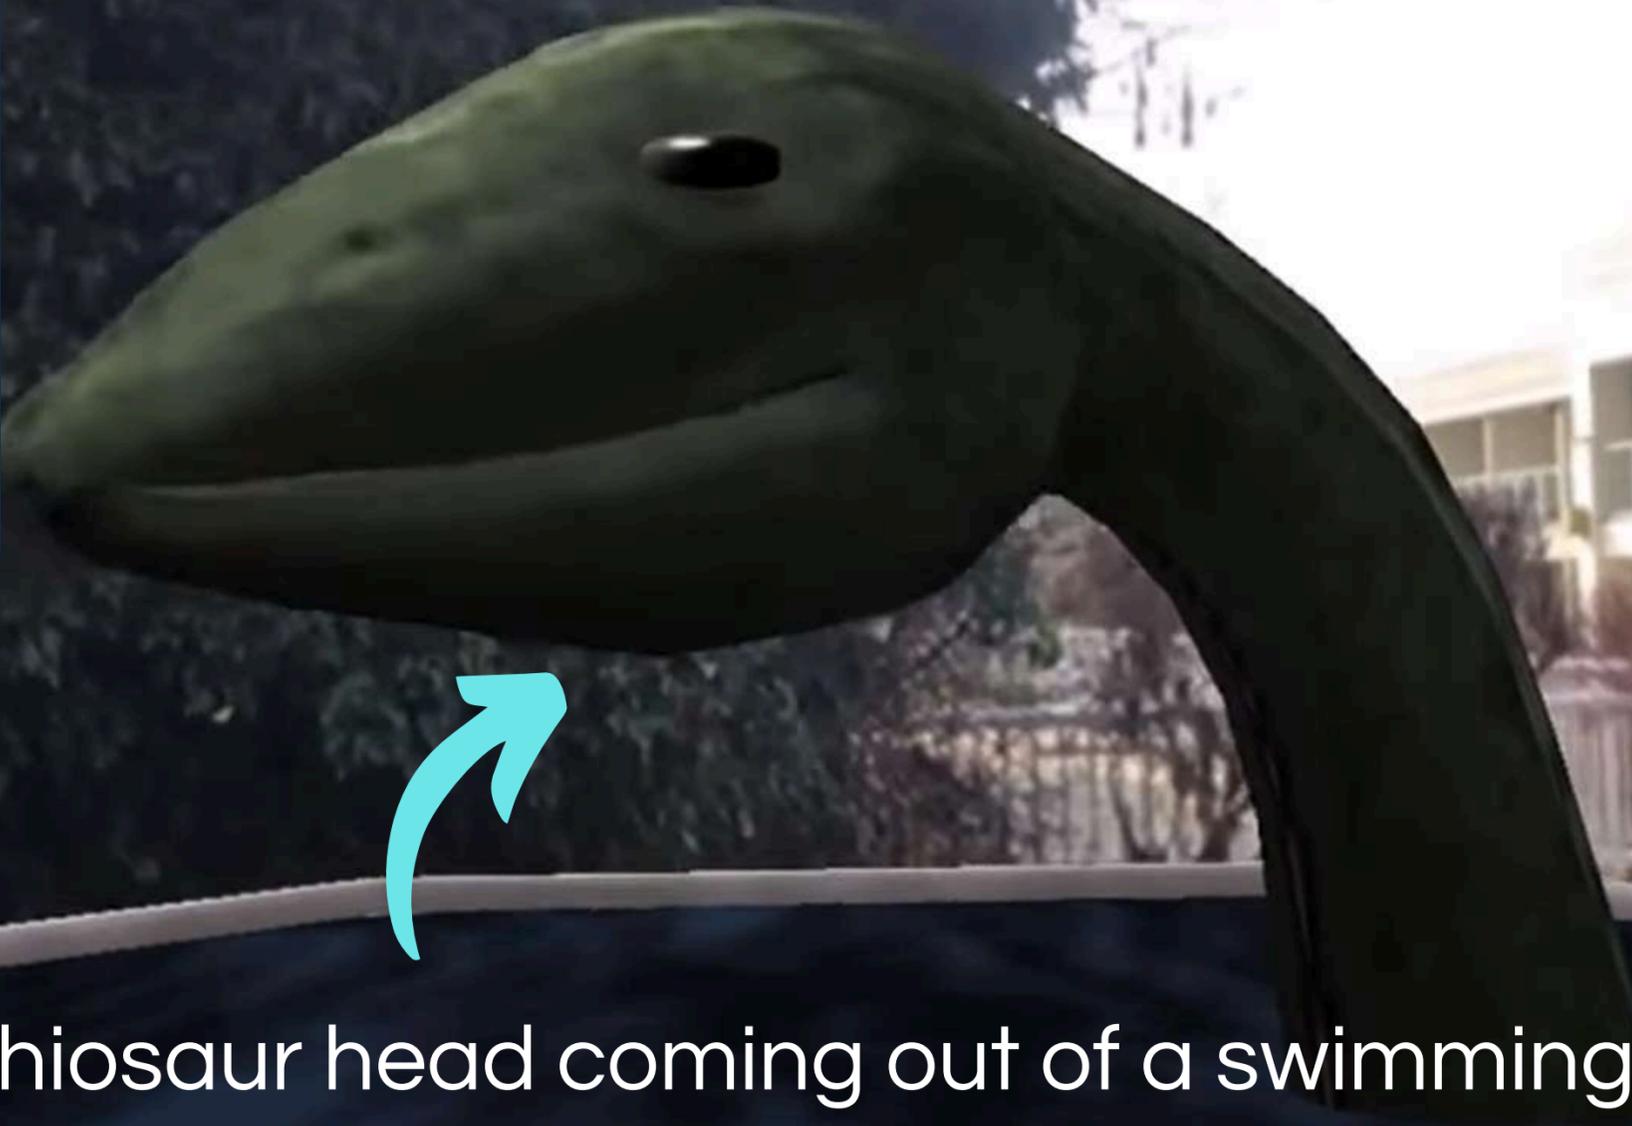

This is an example of smart tourism, e.g: of improving the touristic experience thanks to IT (in this case, explore a long-forgotten history of the city)

App **Sauria**:
children can
collect all kind of
digital dinosaurs
around **museums**
or **hotels**

Branchiosaur head coming out of a swimming pool
in a Best Western hotel

It works well also in other locations

Some hotels attract guests by offering them AR gamification: interactive experiences (e.g: quests, treasure hunts) overlaying virtual objects into the hotel's rooms

By David T. Hill
MARRIOTT BONVOY

<https://www.youtube.com/watch?v=RILcP5B7wbA>

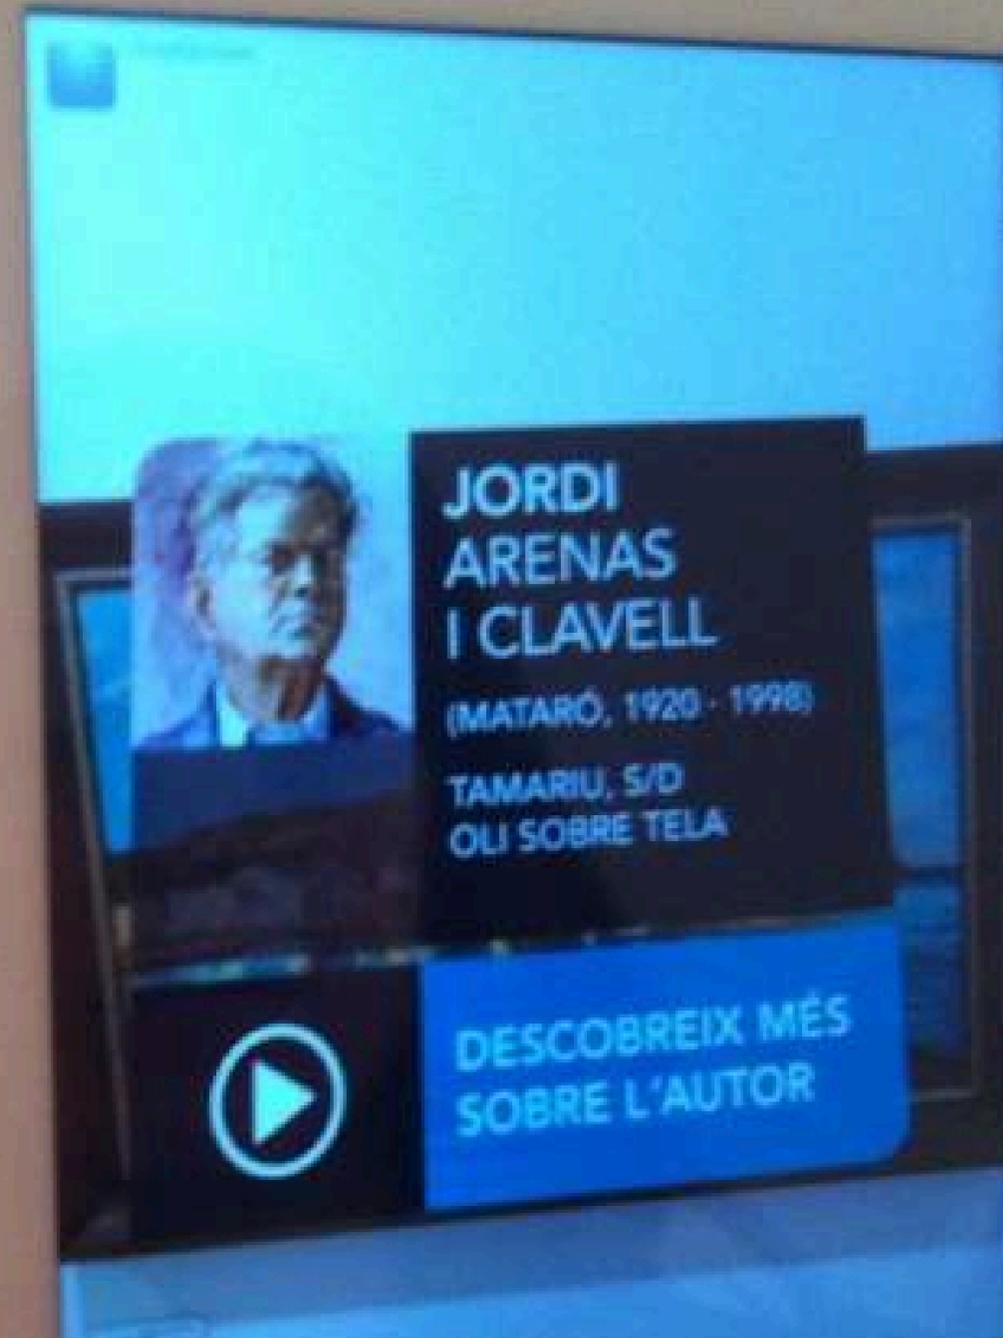

Example: promote cities like [Alghero](http://www.playalghero.it) (www.playalghero.it)

City Tour apps display info on the screen regarding places of interest, museums, galleries, and other tourist attractions

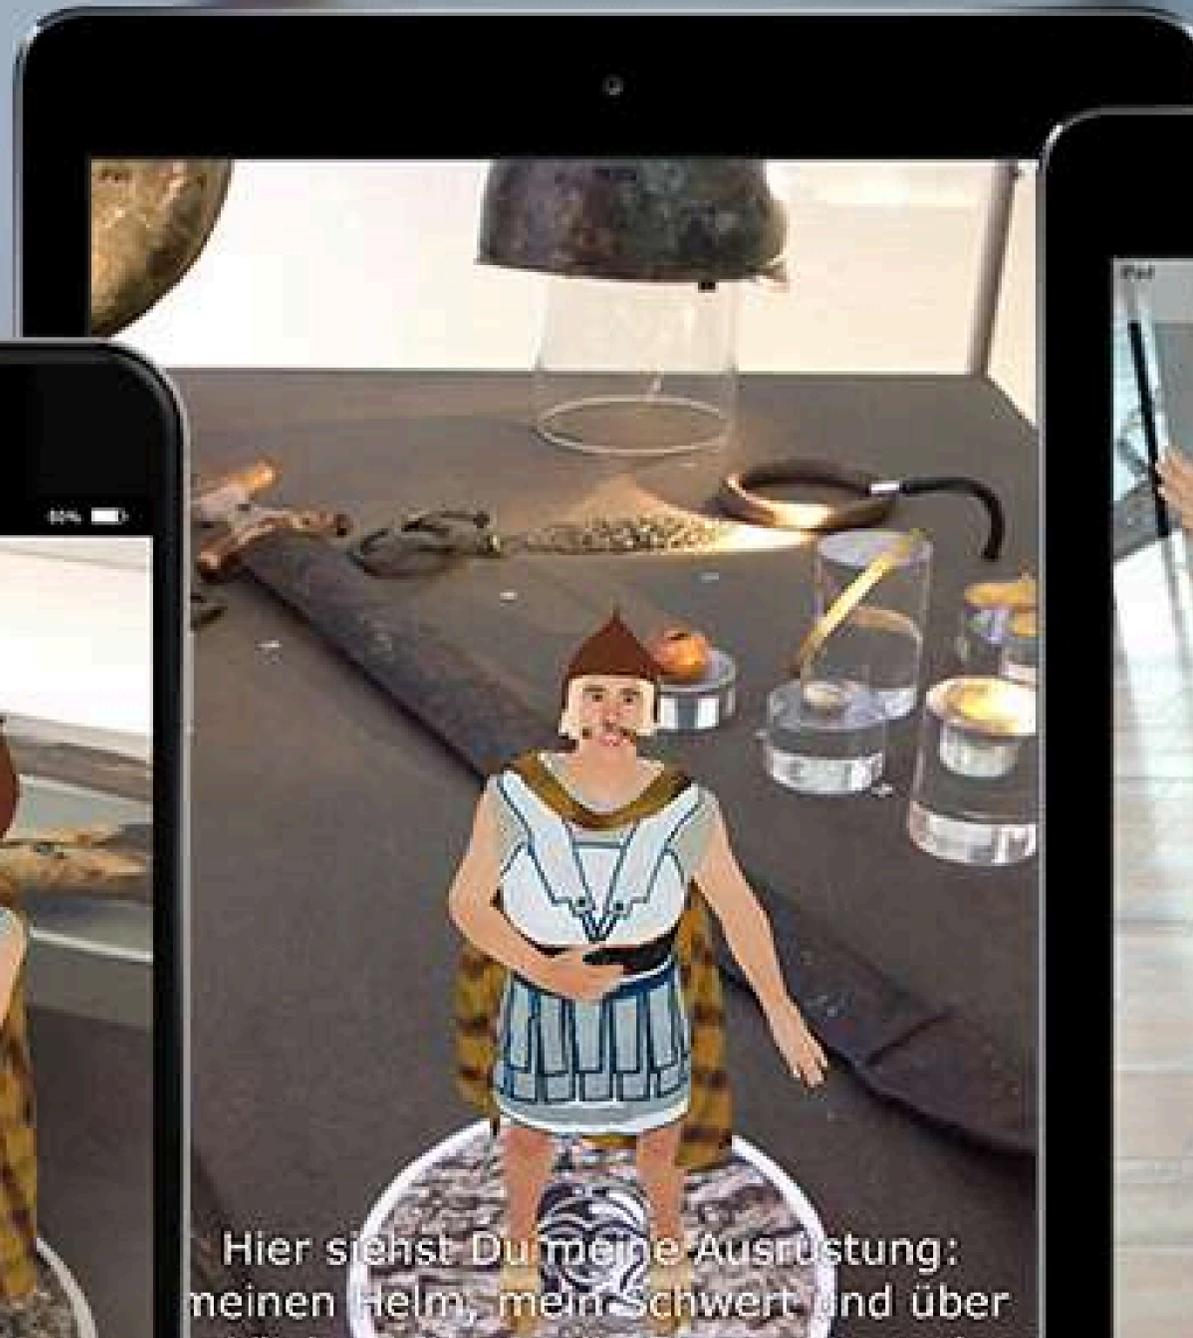

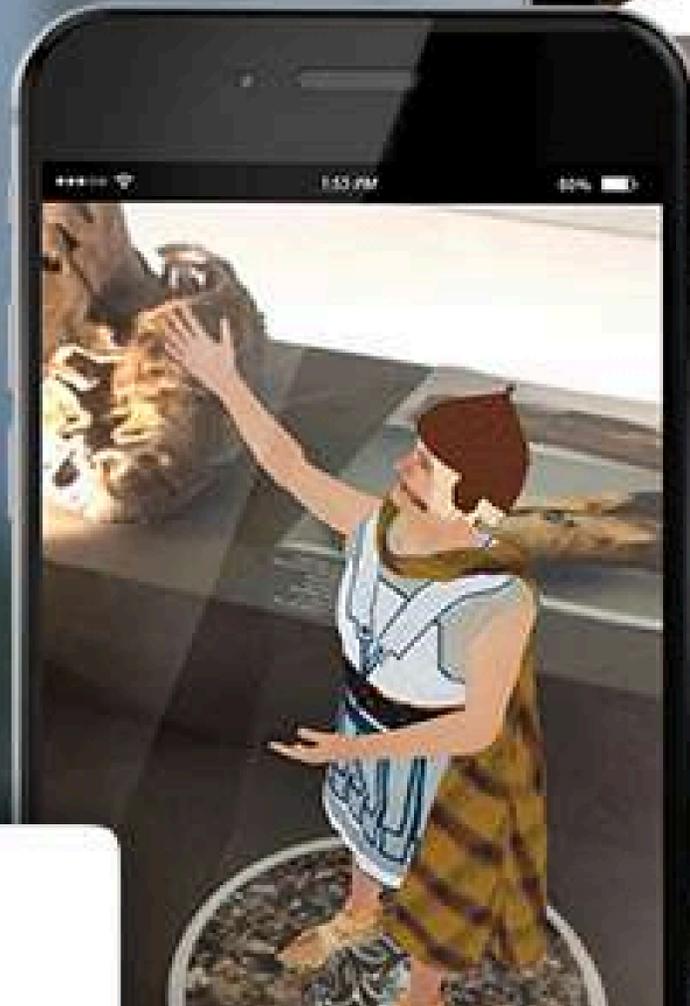

They can also include **audio**, announcing features of interest at a particular site when they become visible to the user

tant en essència com per la
immensitat de la natura com
un violent onatge que travessa

eficència es tradueix en un
na, on també hi té presència
persones accentua aquesta
el qual ens n'allunyem quan
de color, llum i moviment.

There are many possibilities for the use of AR in museums.
E.g: to show more information when visitors view exhibitions

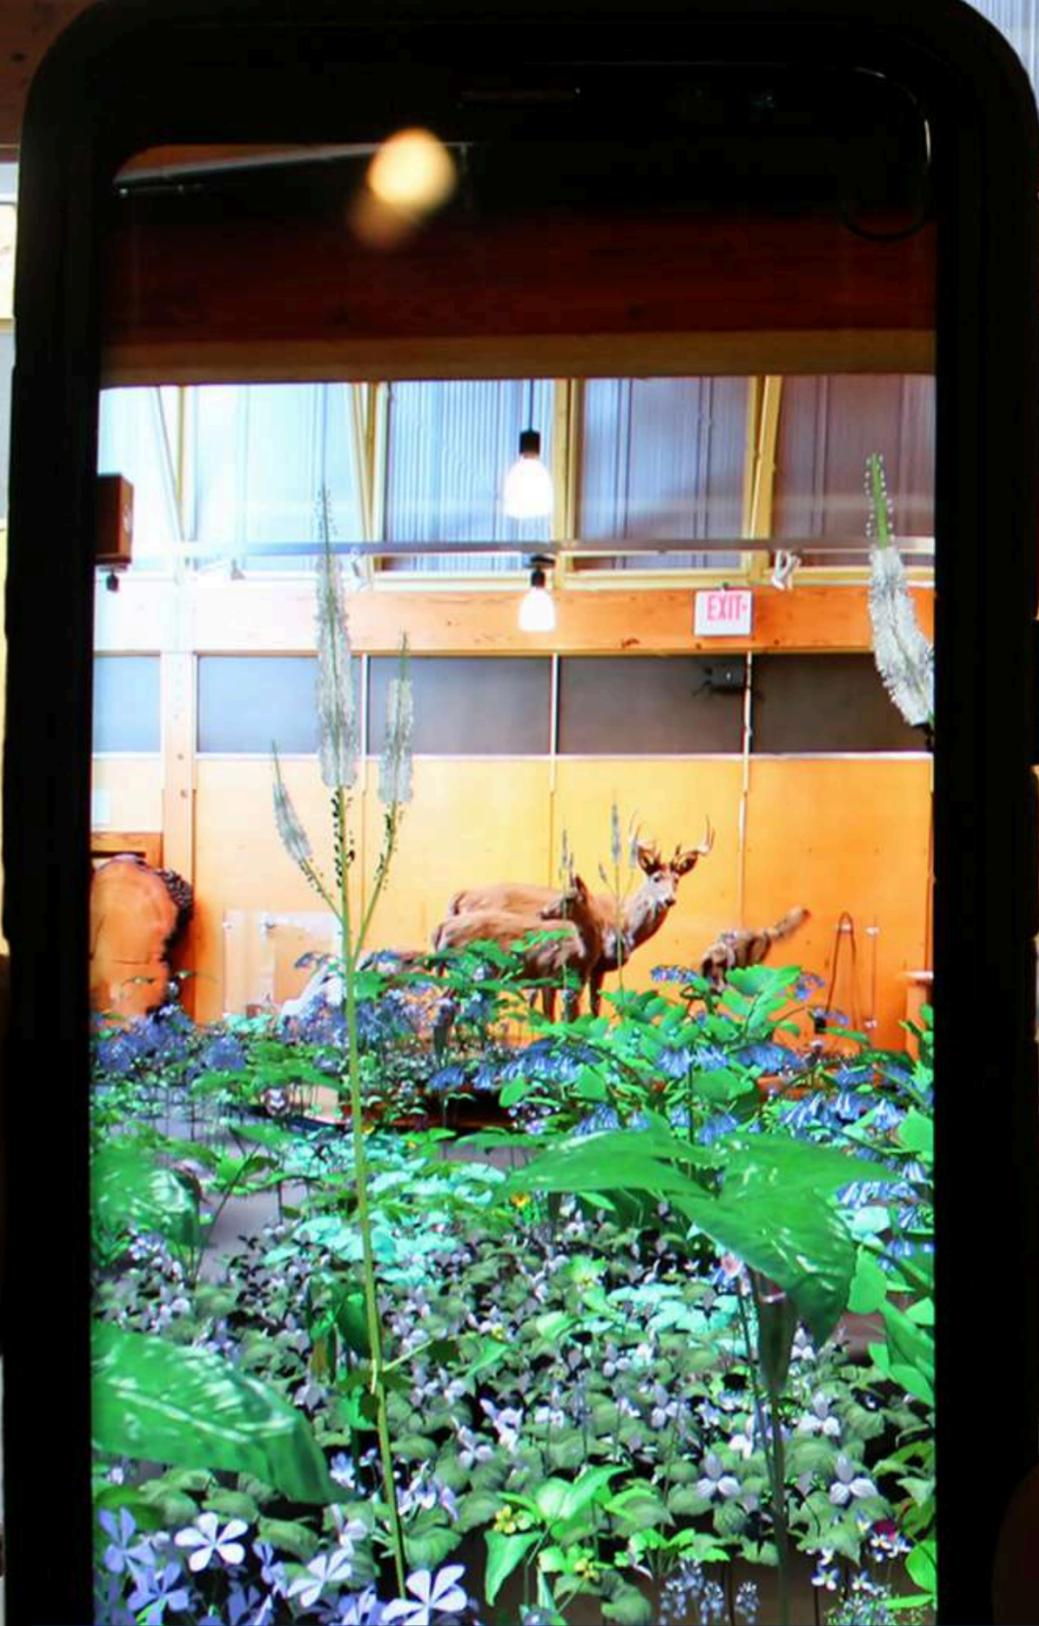

You can also display a virtual version of the artist or of the portrait subject next to the artwork, and make him/her speak to provide a narration of the artwork

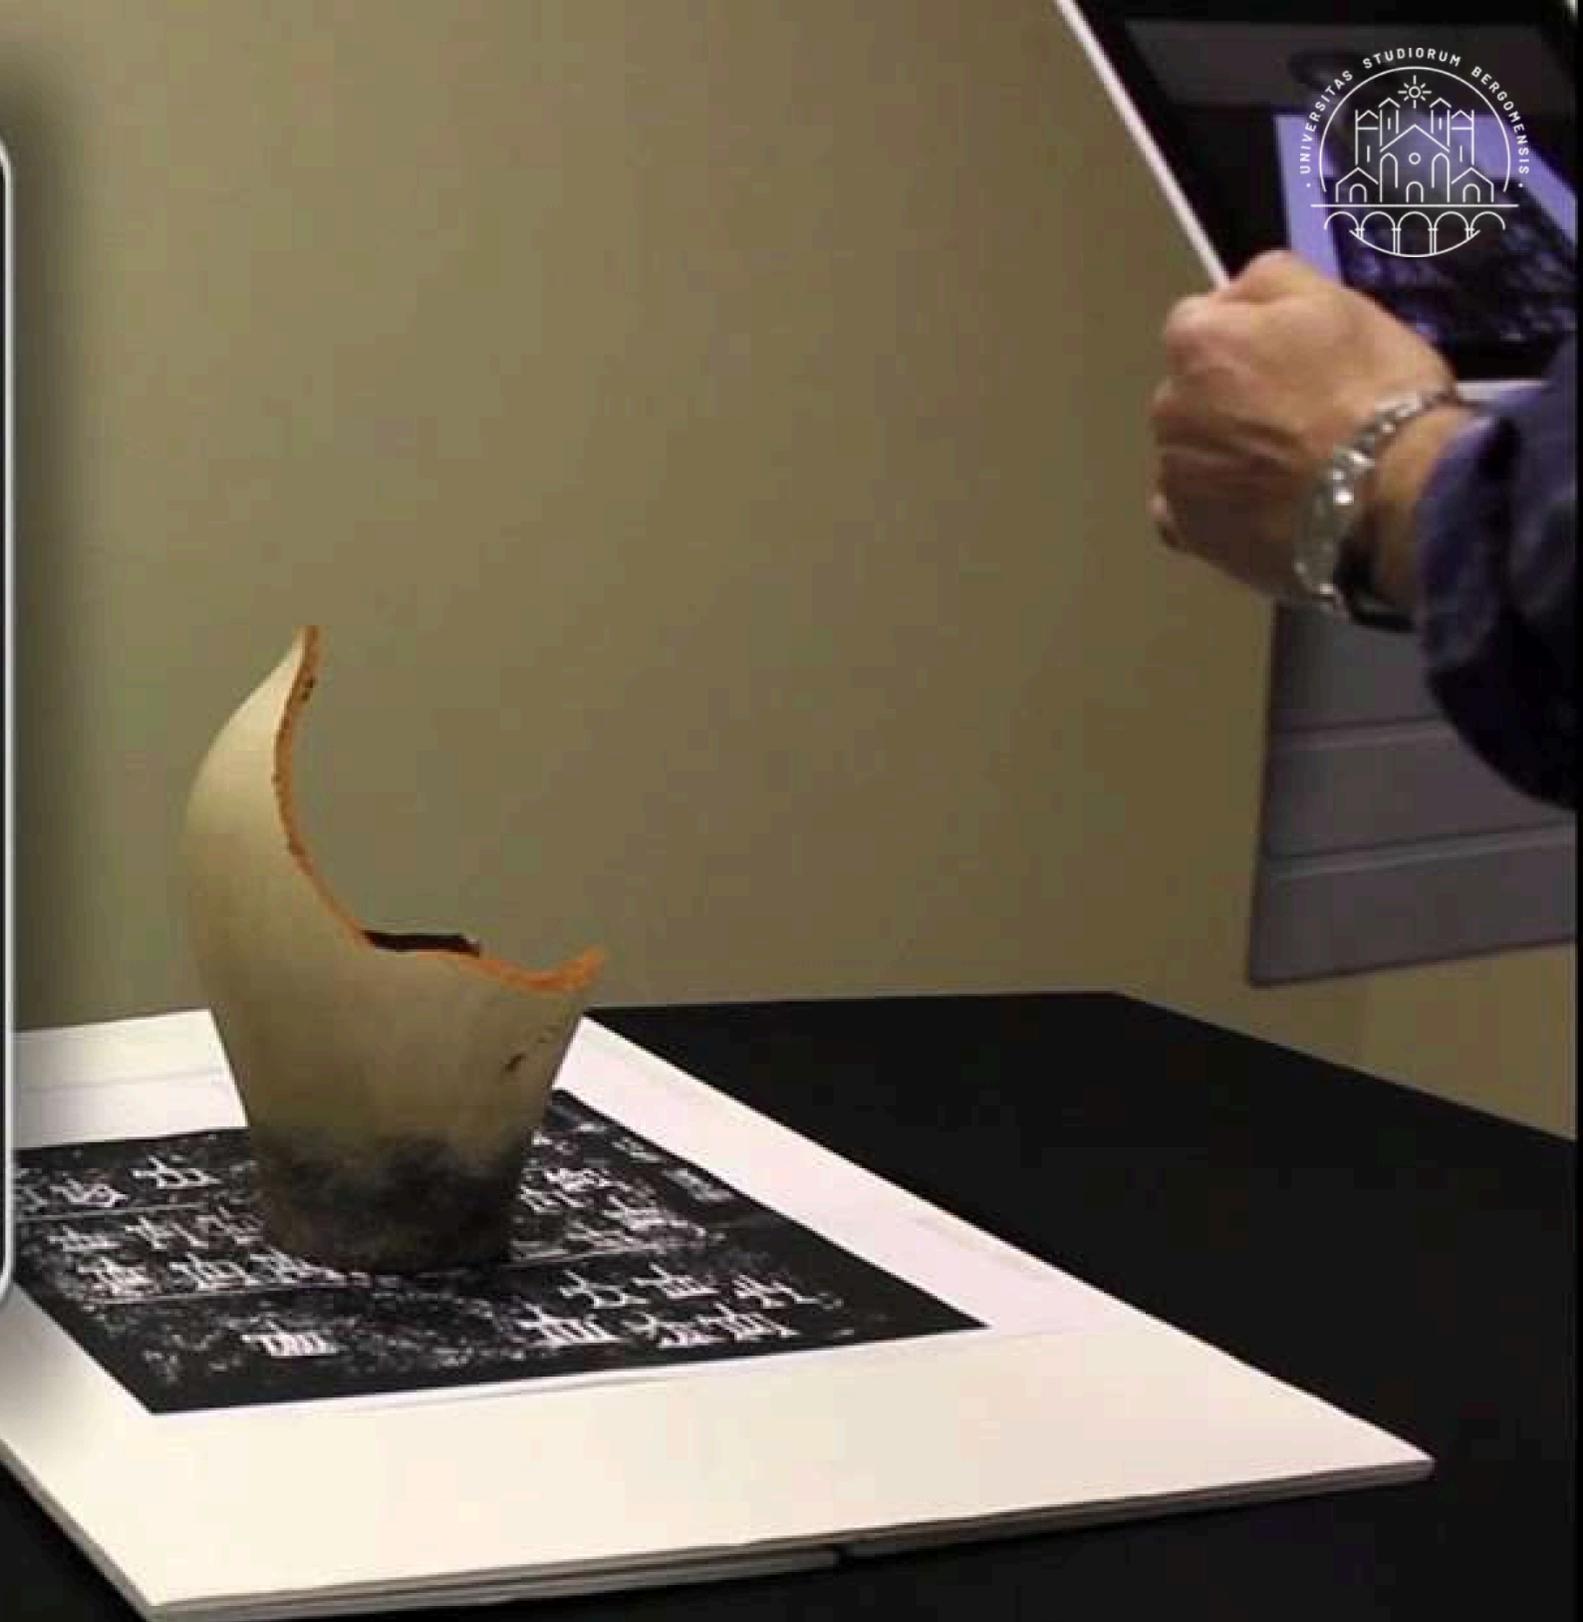

You can bring objects or scenes to life

You can bring objects or scenes to life

Or restore broken objects to their original form

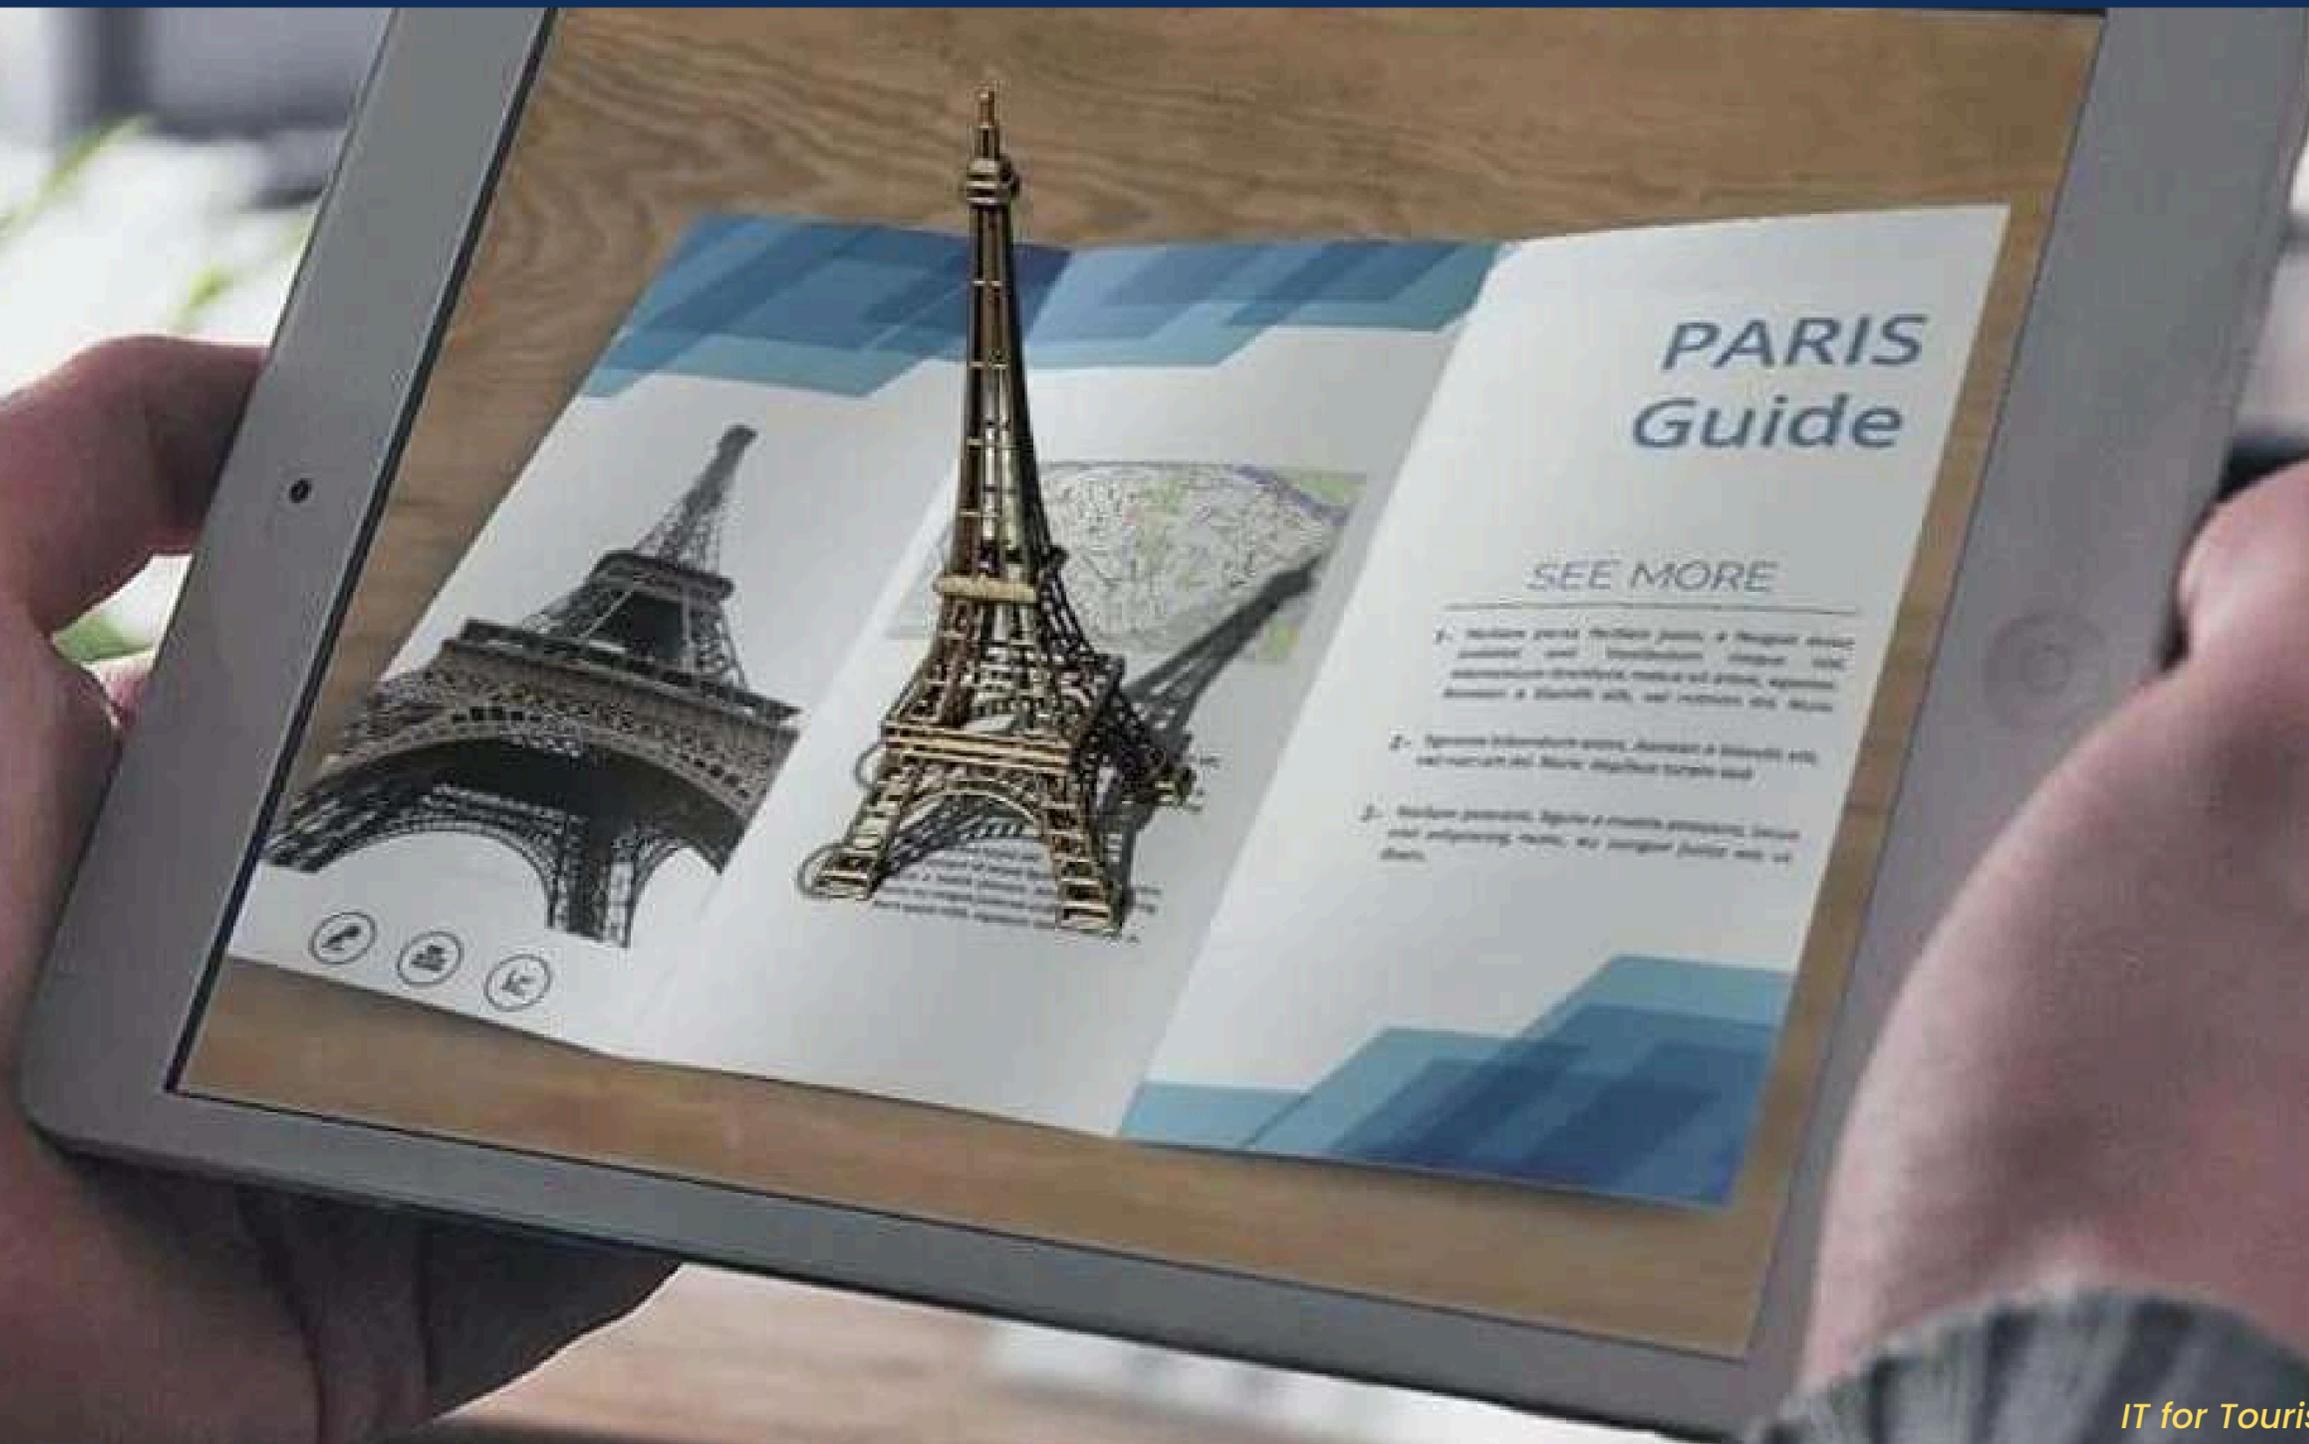

...and even recover paintings that were stolen

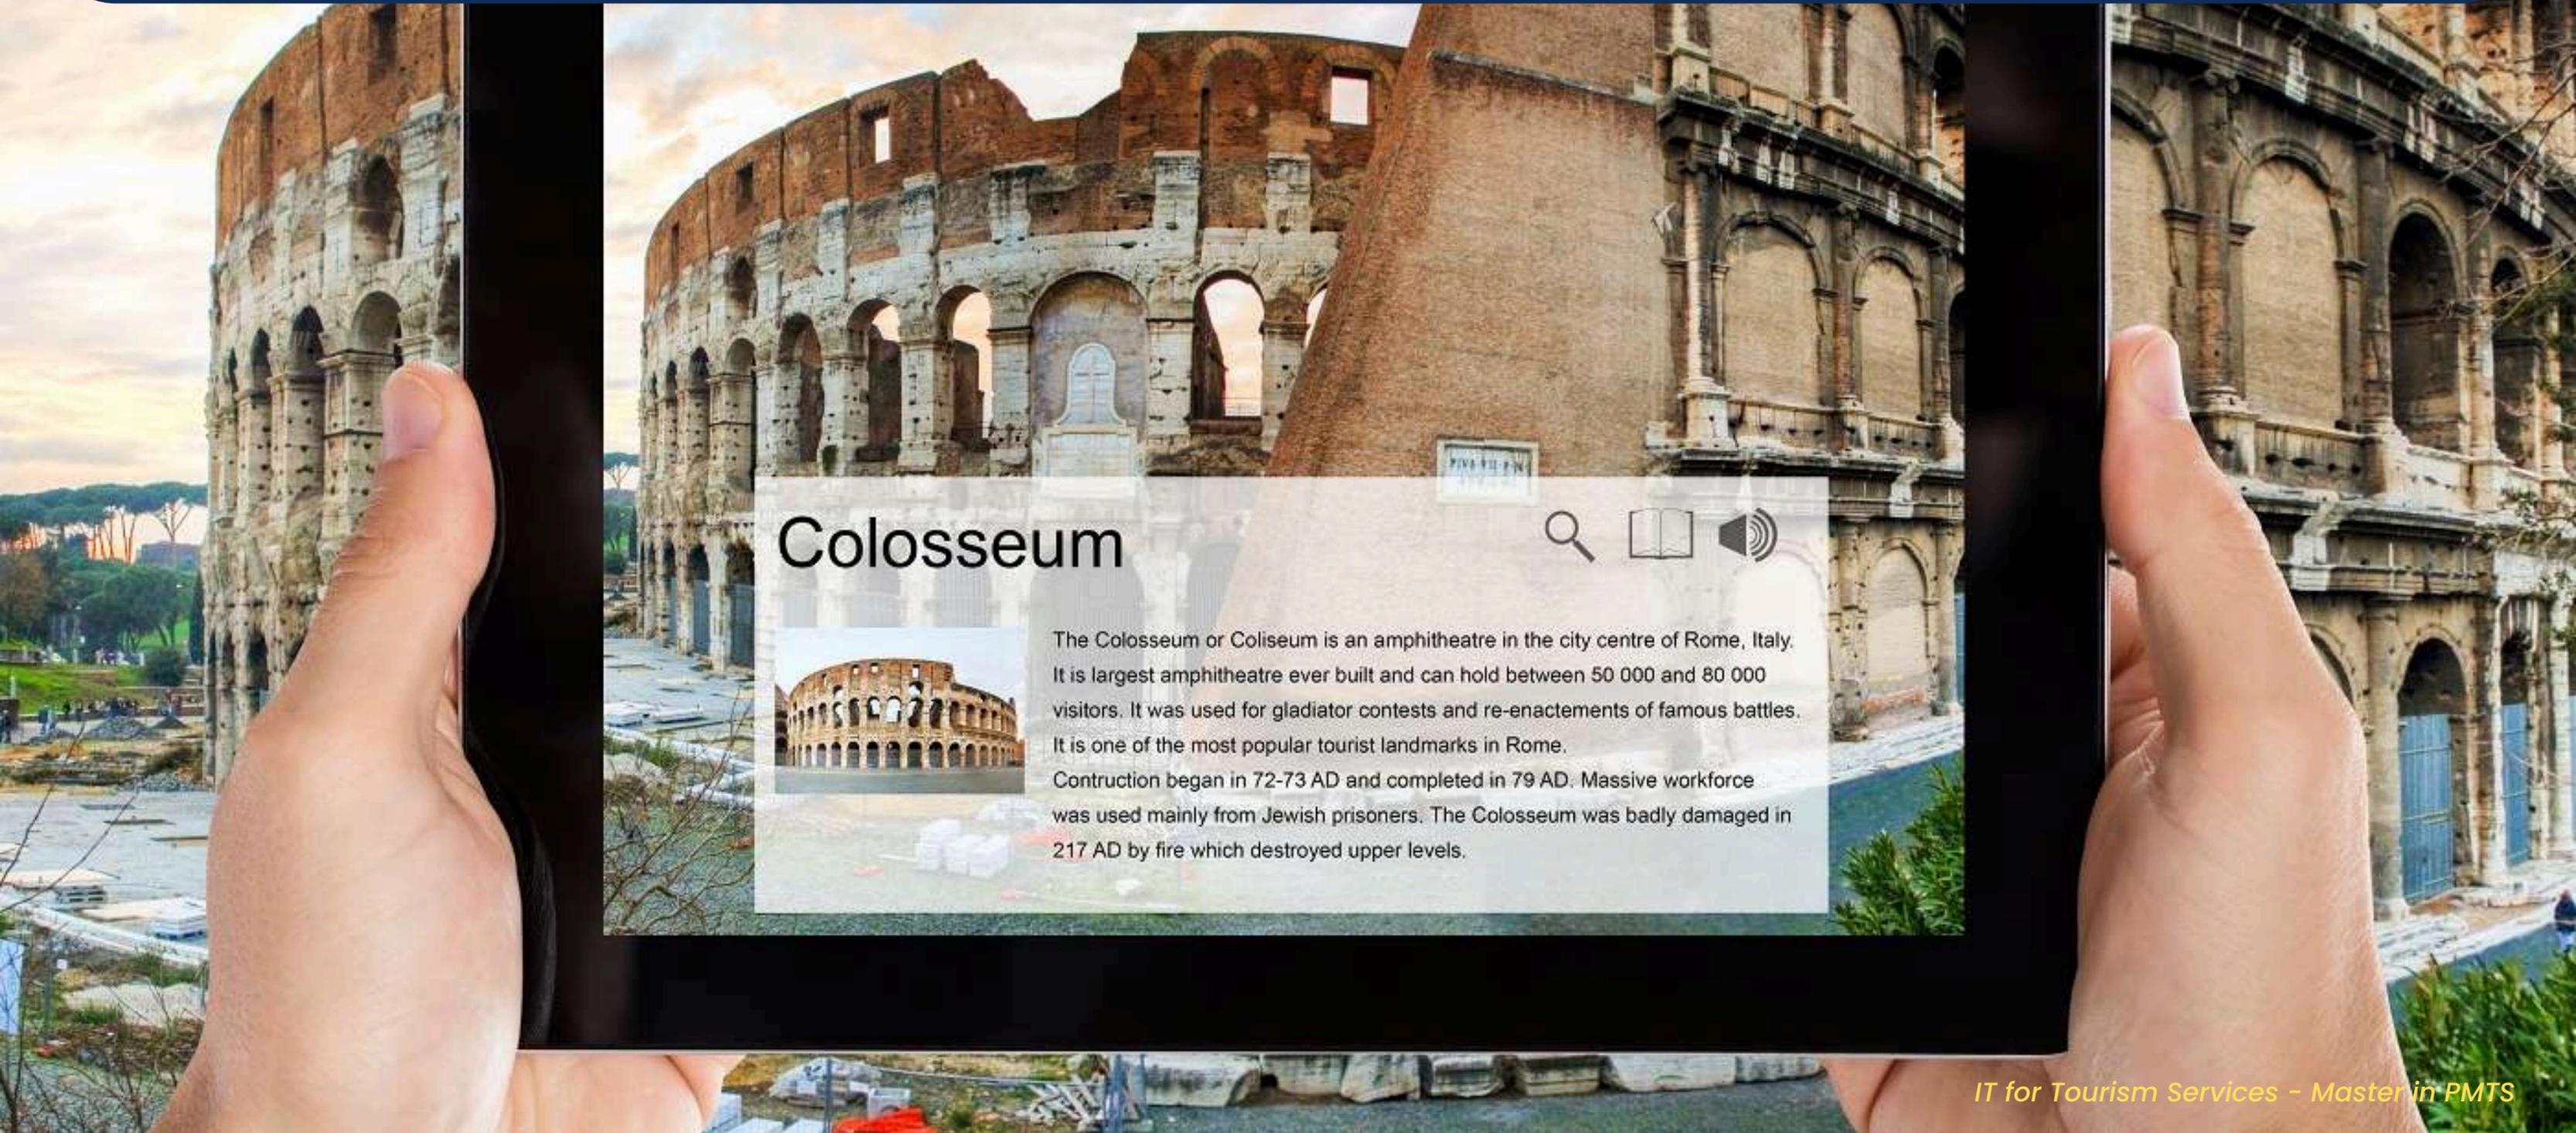

GIVE YOUR
ART
A LIFE
WITH
AR

Possibilities are endless

Travel agencies can also employ brochures that AR transforms in a 3D version to advertise the location

AR is less used than VR to advertise travels and locations. It is usually employed to enhance the touristic experience

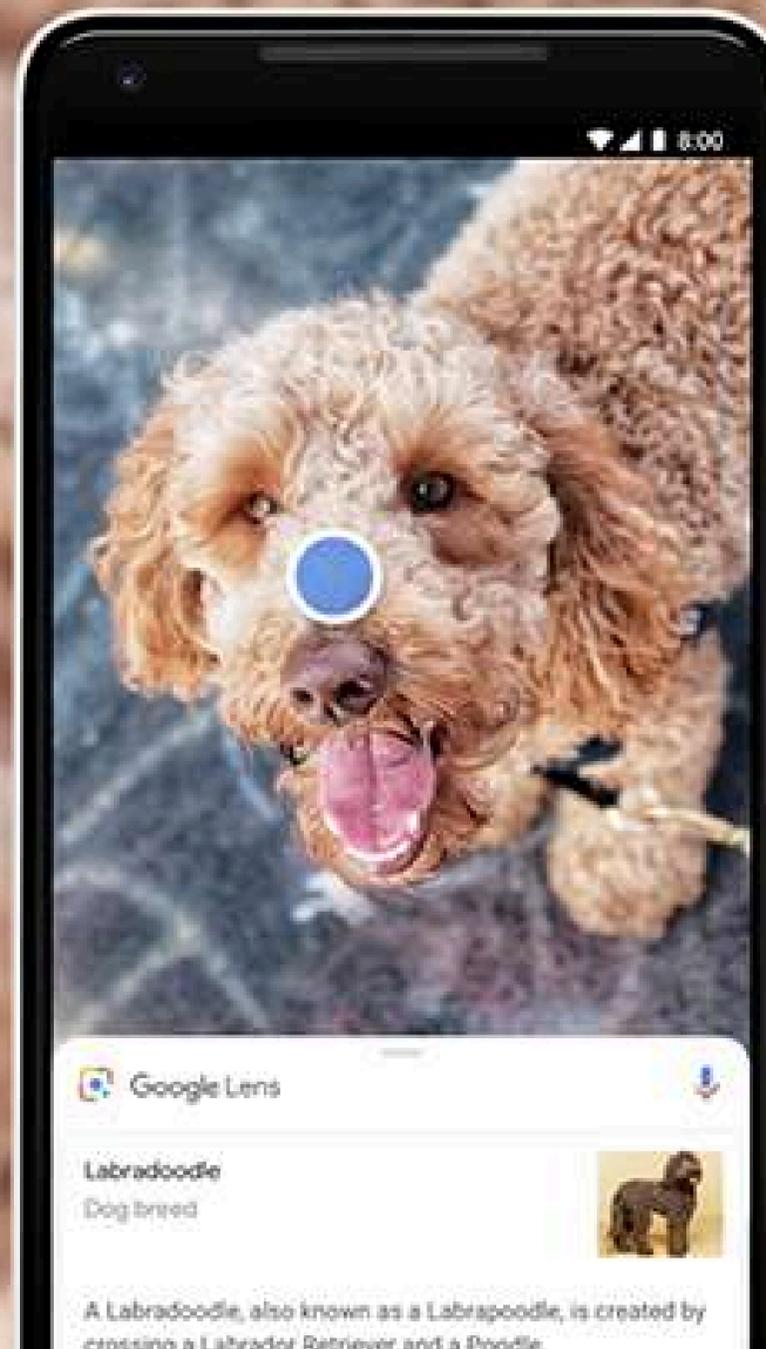

Colosseum

The Colosseum or Coliseum is an amphitheatre in the city centre of Rome, Italy. It is largest amphitheatre ever built and can hold between 50 000 and 80 000 visitors. It was used for gladiator contests and re-enactments of famous battles. It is one of the most popular tourist landmarks in Rome. Construction began in 72-73 AD and completed in 79 AD. Massive workforce was used mainly from Jewish prisoners. The Colosseum was badly damaged in 217 AD by fire which destroyed upper levels.

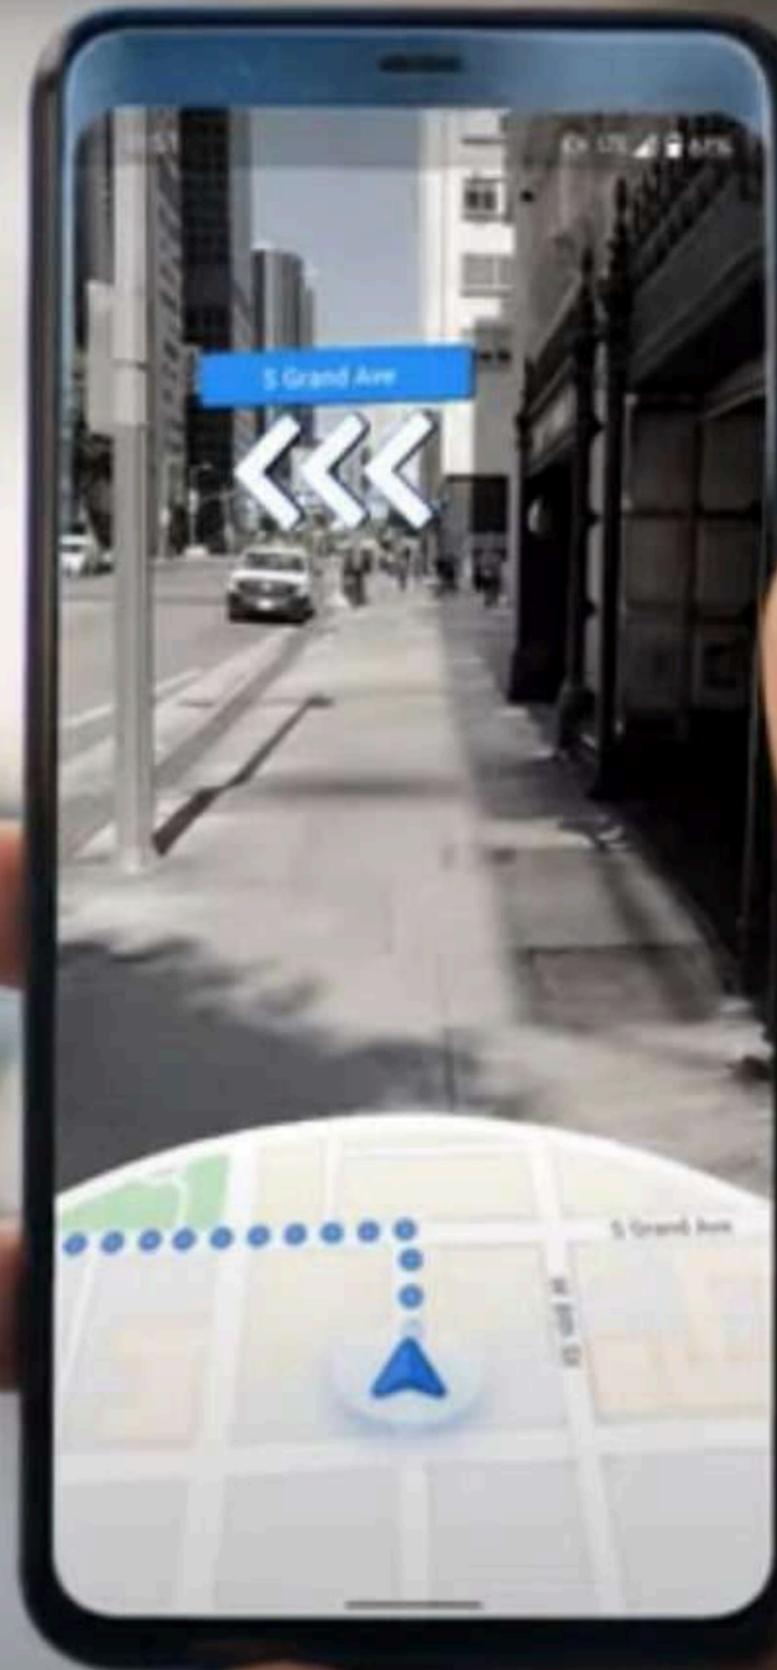

A simple app like Google Translate is the mix of many sophisticated information technologies

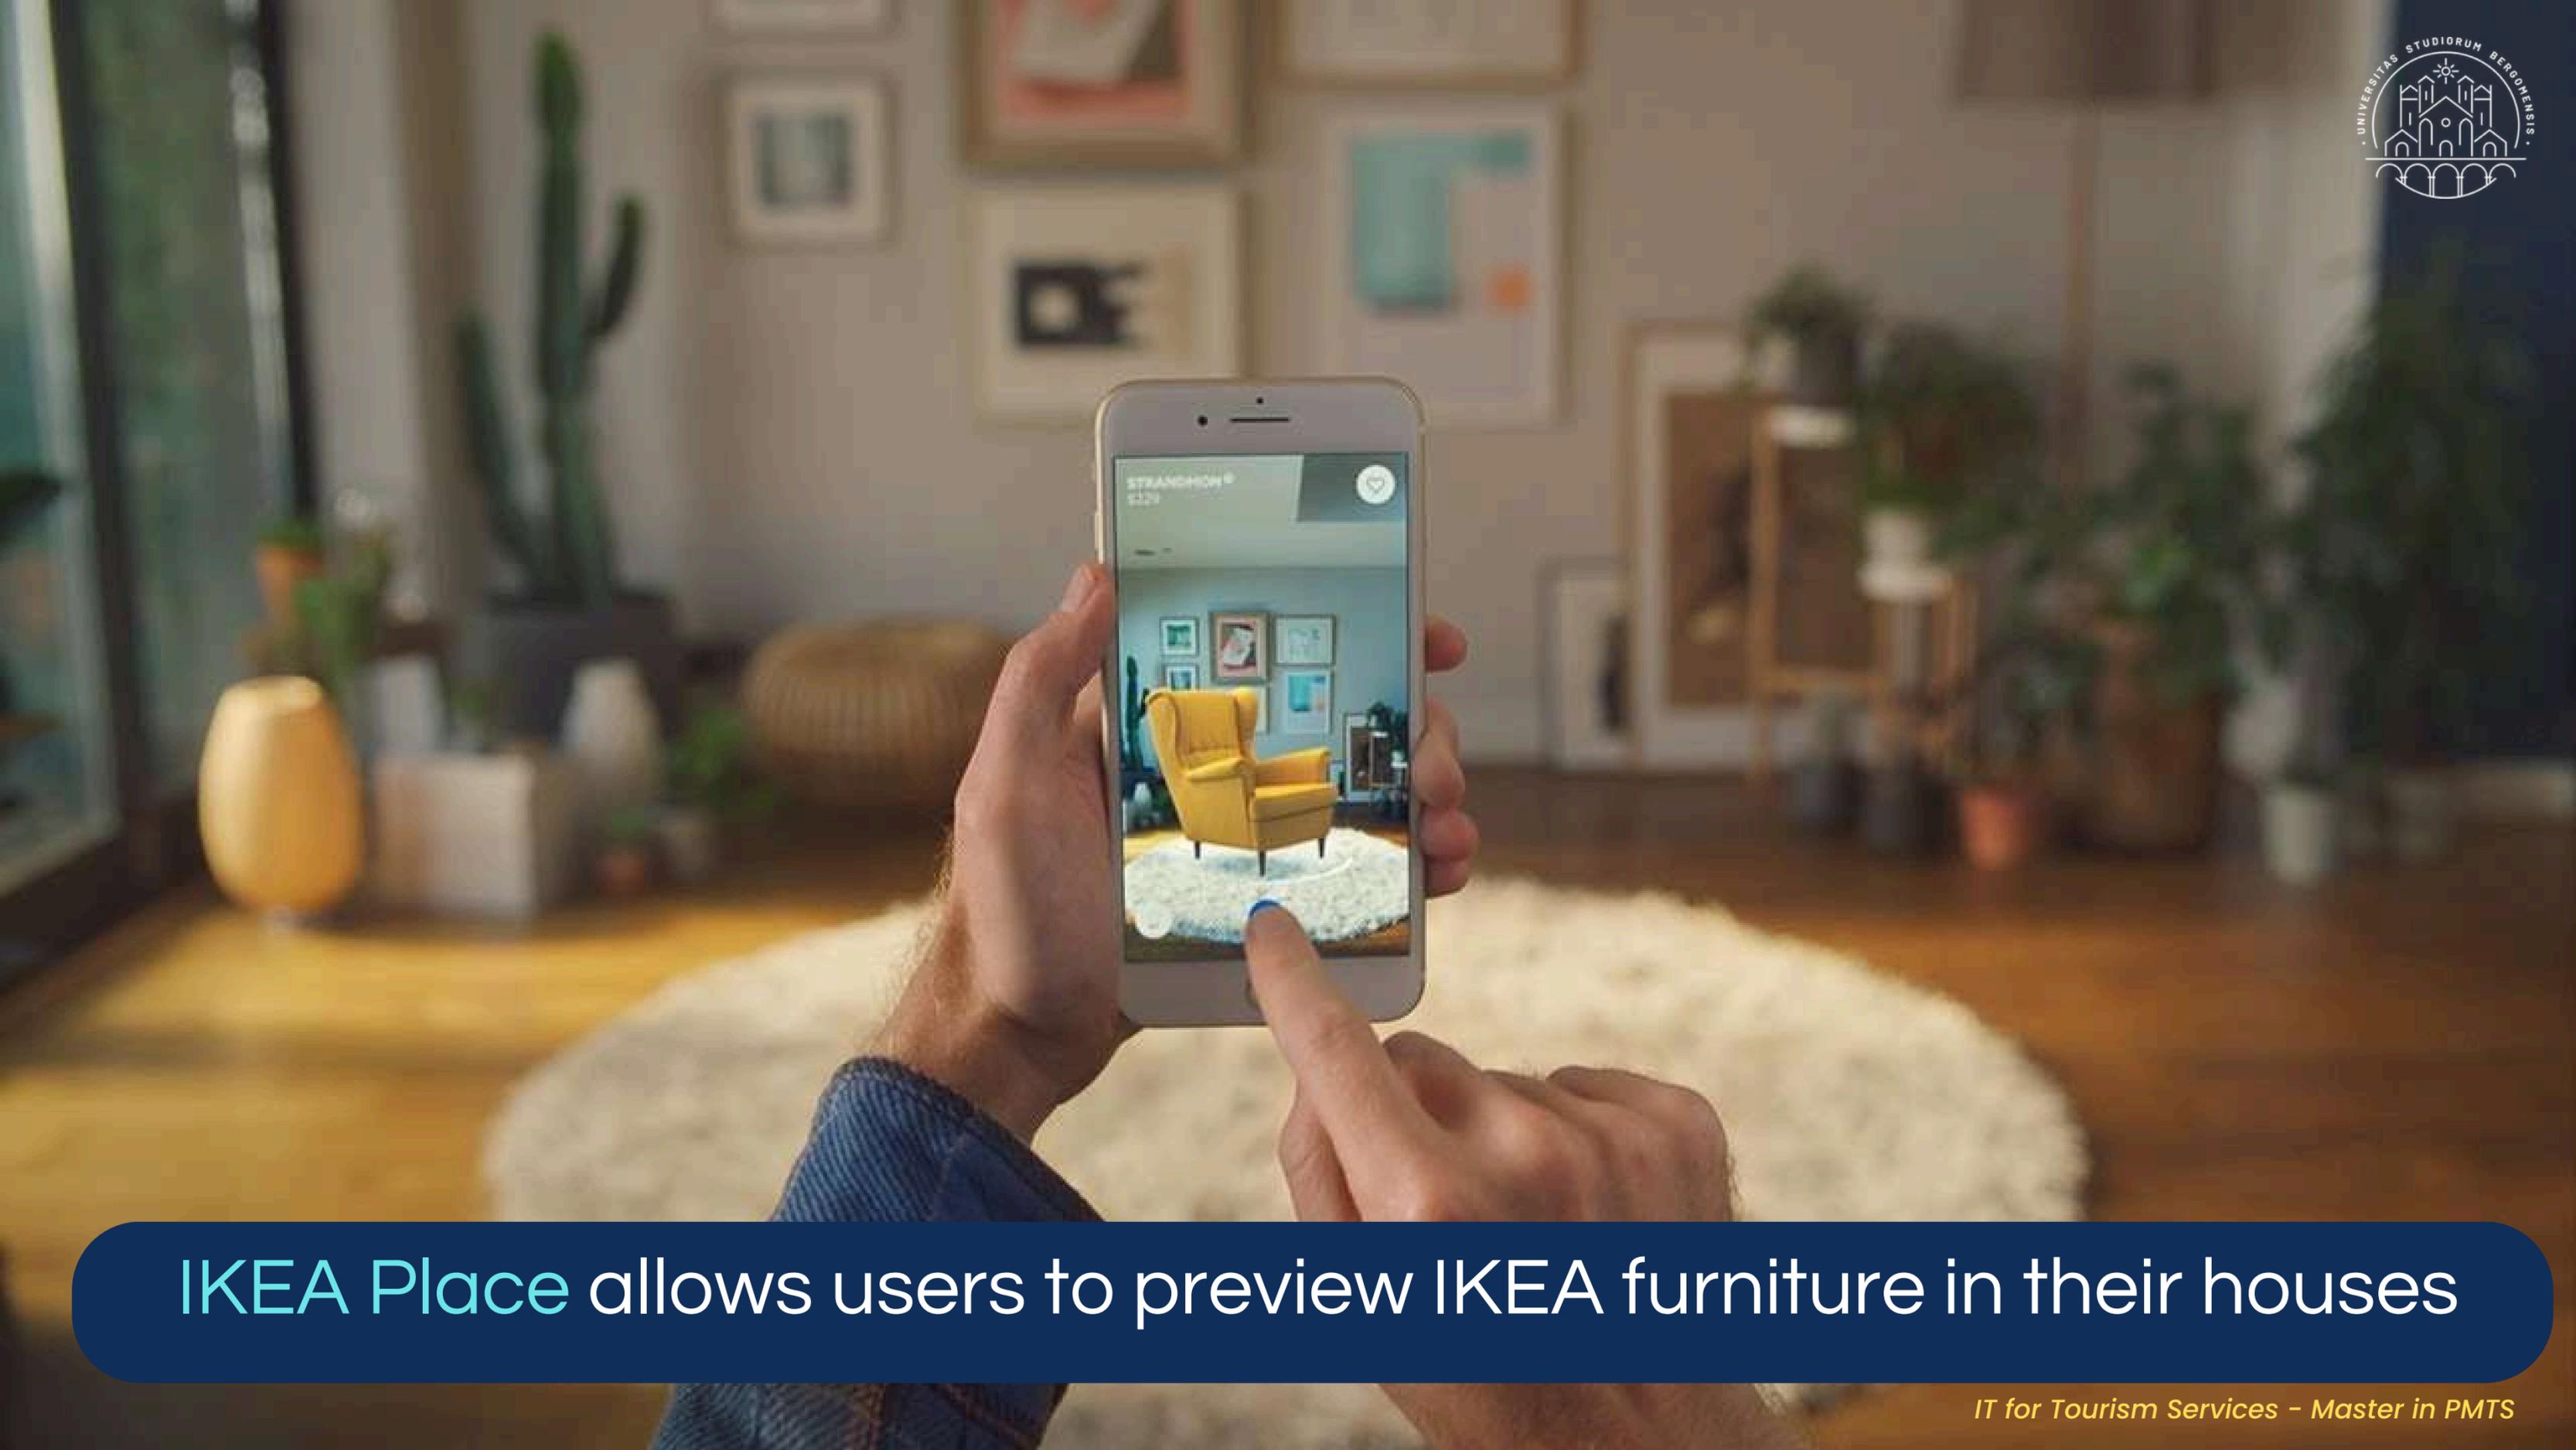

Google Lens is a powerful IT: users point the smartphone at an object to identify what it is, give informations about it and eventually where to buy it

Google Maps has a feature called "Live View" that directs you to your destination thanks to virtual arrows and pointers

- Tschuggen 2521 m
- Drättehorn 2794 m
- Schwarzhorn 2927 m
- Rothorn 2526 m
- Glogghüs 2534 m
- Fulenberg 2374 m
- Hochstollen

ARAlpineGuide is a free app to identify mountain names

IKEA Place allows users to preview IKEA furniture in their houses

Snapchat
employs a form
of AR to apply
filters and add
special effects

Cartoon 3D Style

by Snapchat

VALENTINE'S DAY

MAKEUP LOOKS

COLOR

YOUR HAIR

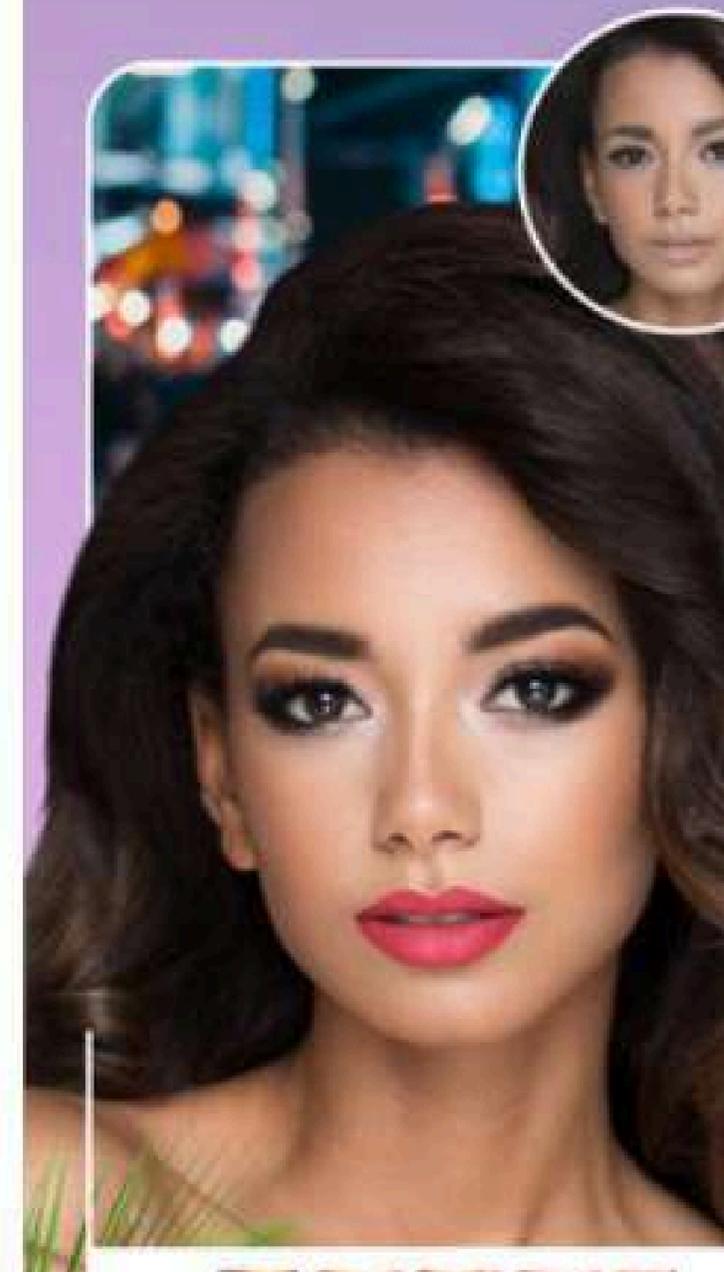

BACKGROUND

ERASER

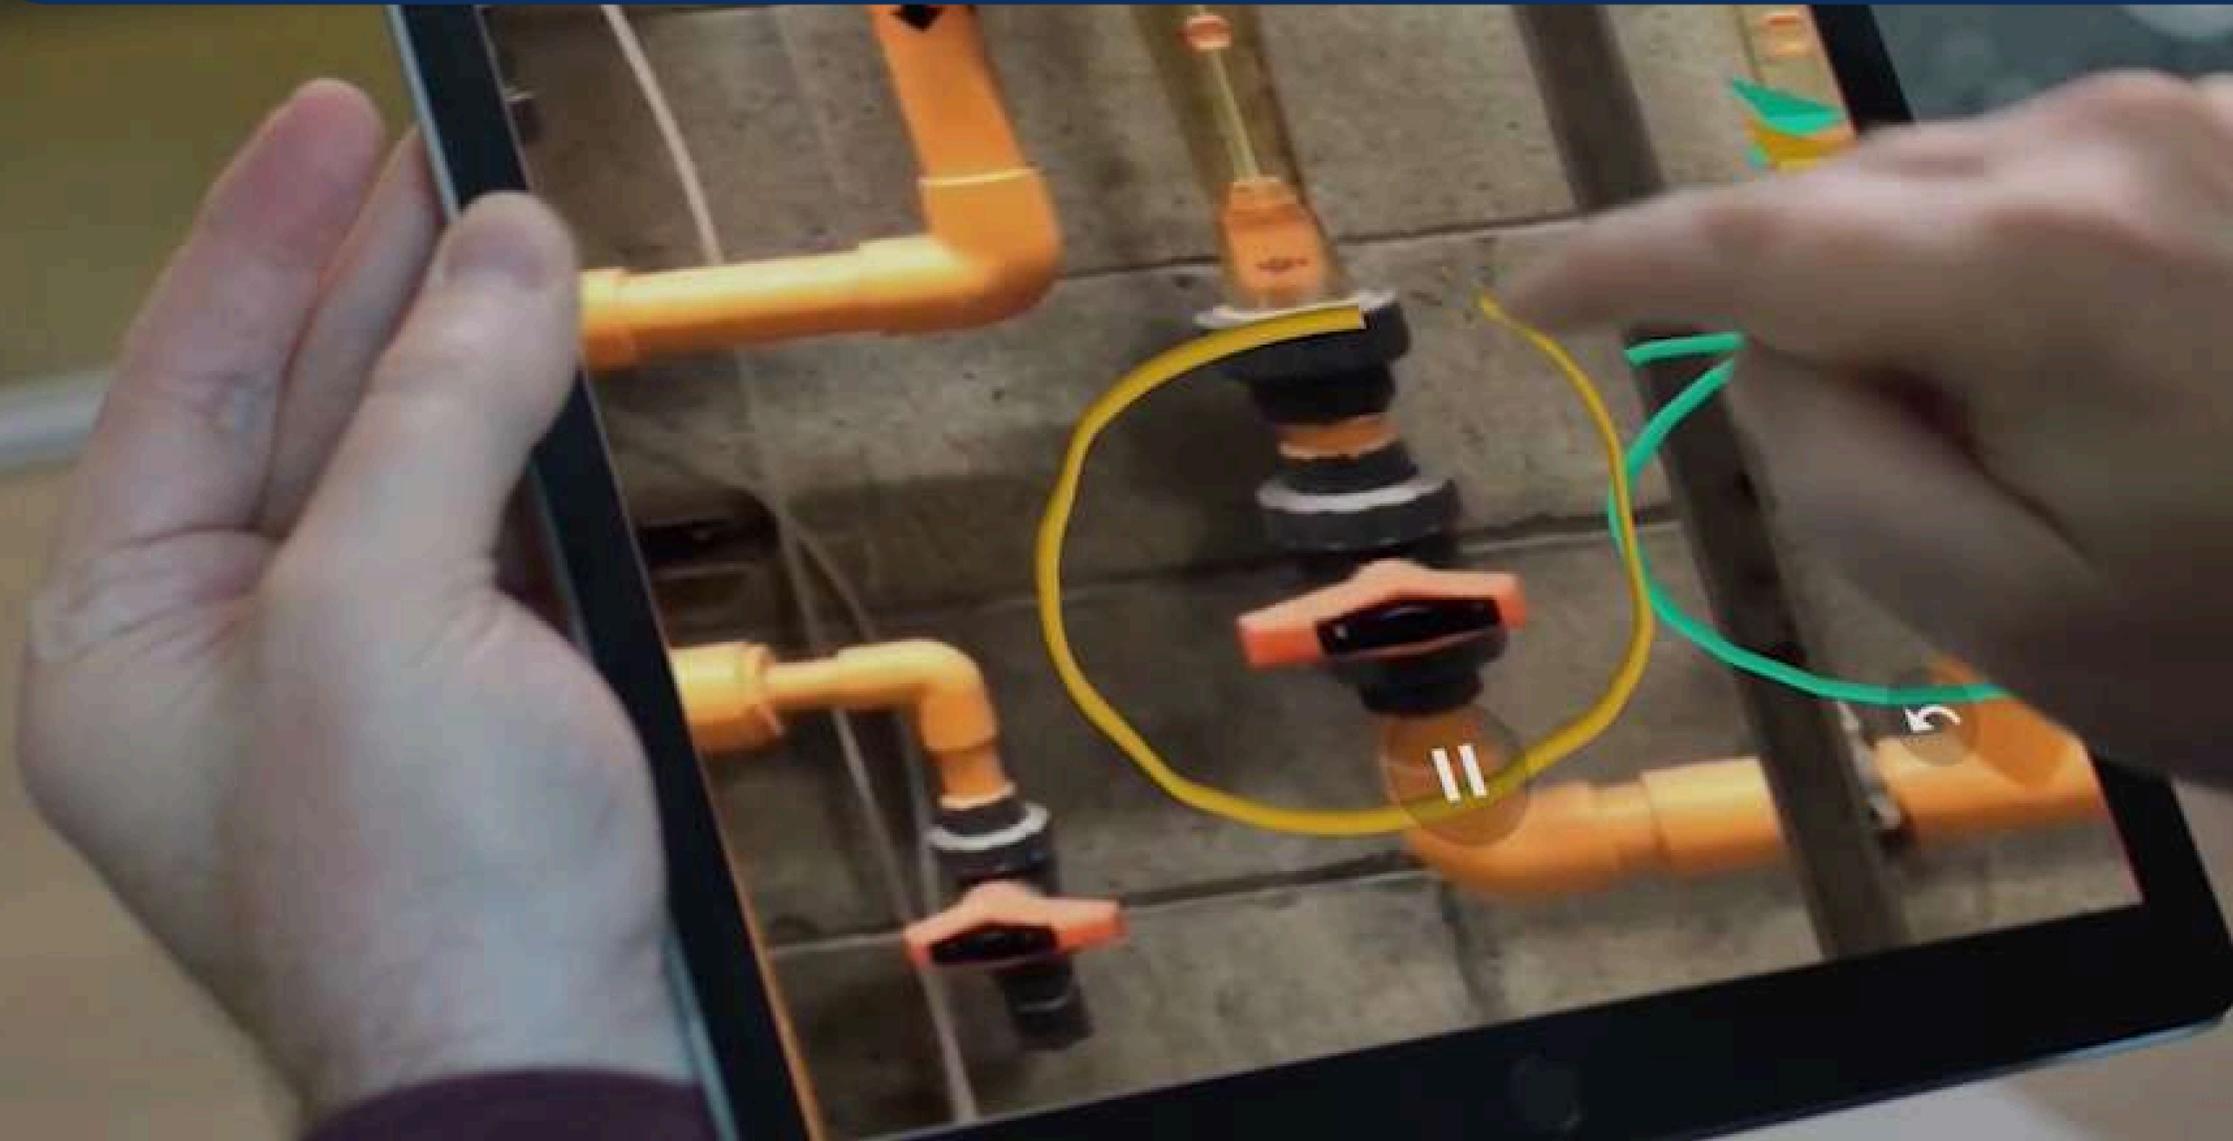

MAKEUP

FOR HOLIDAYS

YouCam Makeup lets users virtually try on real-life cosmetics

Vuforia Chalk is a simple but useful app in which you can share your screen with another person that can draw on your screen with augmented reality chalk marks that work like **visual annotations**, letting you find the right buttons, switches and controls, without the confusion caused by verbal descriptions

2014.09.01 07:55 PM

Sky Tonight is one of the best stargazing apps: it displays star names, constellations, planets and other celestial bodies in real time over the sky

Holo app allows insert holograms inside your photos or videos

Google

The new Google's [Smart Glasses](#) will also translate what you hear and show you the text with the translation inside the lenses

SUMMARY

VR

- popular but expensive and not yet widespread (100 million VR headsets sold)
- in the tourism sector VR is useful for travel promotion, to preview a destination thanks to promotional videos

AR

- widespread and easy to use. Just less known than VR.
- in the tourism sector AR is useful for enhancing the touristic experience (smart tourism)

FIRST PROJECT WORK

FIRST PROJECT WORK

- First real member!
- Spam filter
- Facebook algorithm and new user accounts
- Check student accounts with “?”
- Insert eventual new arrivals in the groups
- Example post

FACEBOOK ALGORITHM

Unfortunately, all the posts and comments of the students with a newly created facebook account are not considered by the algorithm

FACEBOOK ALGORITHM

This means that **only** students with an old fb account should post in the group, while the other ones can still comment

Students with an old fb account are highlighted in **green** in the "Project Work: Groups" spreadsheet

SECOND PROJECT WORK

AN APPLICATION OF HERITAGE FOR ALL

You are going to use social media in the **proper way**, by disseminating part of the **immaterial heritage** of our civilization

TikTok

TASKS FOR NEXT LESSON

- First project work:
 - If your fb account is an old one (green color in the google sheet with your name), publish a new post in english in the fb group *Alps for Beginners*, modifying an existing post in *Dolomites for Beginners* (choose one). Ask Gemini to modify the text and the image of the original post (choose only 1 image if the post has many); see the README
 - *Comment 5 posts* of your companions (10 if your fb account is a new one created in 2025). You can also ask Gemini to suggest a comment to the post; one or two of your comments should be comments to other comments
 - Then, *like* all the new posts published by your companions in the community
- Second project work:
 - *Join* the English TikTok channel of the *"Time Travelers"*: <https://www.tiktok.com/@time.travelers.official>
 - *Choose a channel creator (admin)* for each language
 - *Choose the name* of each new TikTok channel
 - *Translate the tags* of each new TikTok channels
 - *Revise citations 1-875* of the language of your group (split the work between group members). Instead of editing citations directly, insert a comment over their cell. Hindi and Urdu languages are not included in DeepL and should be translated from English using Google Translate and revised manually
 - *New deadline for taking a selfie over the high stairs of Bergamo*: 10th of november
- Suggested movie: *"Avatar"* (2009), directed by James Cameron
