

## Innovation in WASH (Water, Sanitation and Hygiene)

Seminario con *Mansoor Ali*

LUNEDÌ 6 NOVEMBRE 2017

CANIANA, SALA “MARIDA BERTOCCHI” (EX AULA 15)

ORE 12.30-13.30

Water, Sanitation and Hygiene is a basic human need. People in many low income countries, still rely on un-clean water and poor practices of sanitation. UN-SDGs have a stronger focus on improving WASH for the global population. Innovation in WASH can lead to improve access to WASH. Use of real-time data, mobile technologies, new models of business and other ways of innovation can reduce costs and improve access.

**Dr Mansoor Ali** is a lead Technical Advisor on Human Development Innovation Fund, Tanzania. He is a visiting Professor at the University of Brescia.
