

CAPIZ ARCHDIOCESE PROFILING: the SOCIAL ACTION

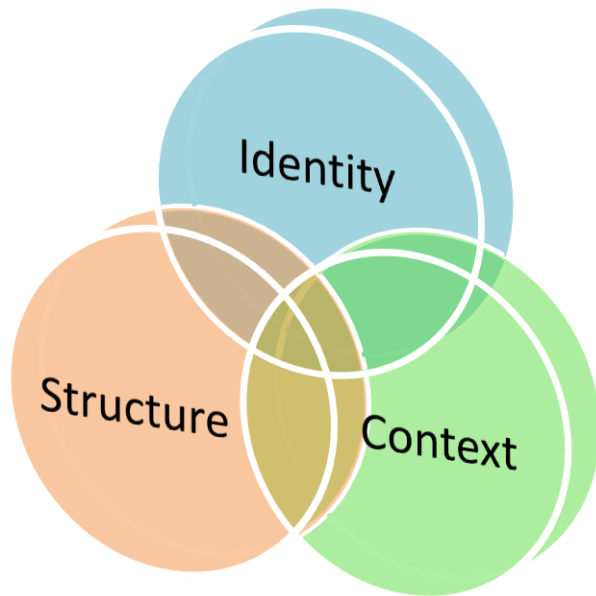

2016

Why conduct a Profiling?

The Archdiocese of Capiz and the Social Action Center in collaboration with Caritas Italiana have decided that there was a need to strengthen the Social Action Center after the super typhoon Yolanda

The Three Basic Dimension (3D)

Three dimensional concepts are the foundation of a social action body: Identity, Structure and Context. In ensuring its accountability, effectivity and contextual-based services towards the vulnerable groups, the church, in its social action, should strengthen these three basic dimensions.

Area Mapping / Profiling is one of the first steps of organization's sustainability in forming its identity and contextualizing their services for the future.

Identity/Value

Caritas: why, what, who are we, where are we from, for whom, where is our destination and how?

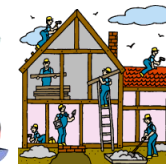

**Who
are
we?**

Structure

What do we need to learn to support the Social Action Center provision of services to vulnerable groups? What technical skills do we need to work professionally?

Context

Who are the vulnerable groups ? why are they vulnerable ? where are they? Who can help our services to help the poor community ?

Caritas must possess basic knowledge on its own geographical area of working to understand the local context, in order to identify the most vulnerable people, and potential networks and foster local solidarity.

Objectives of the Profiling

- To provide a concrete picture of the situation of the communities, parishes and mission stations in the Archdiocese of Capiz
- To ensure accountability, affectivity and to identify contextual-based services towards the vulnerable groups
- To learn more on the archdiocese situation with the aim to address the identified problems and needs and to express with professional intervention on the love and message of the Church to the poorest of the poor

Two Parts

1. Primary Data

A. HH Survey

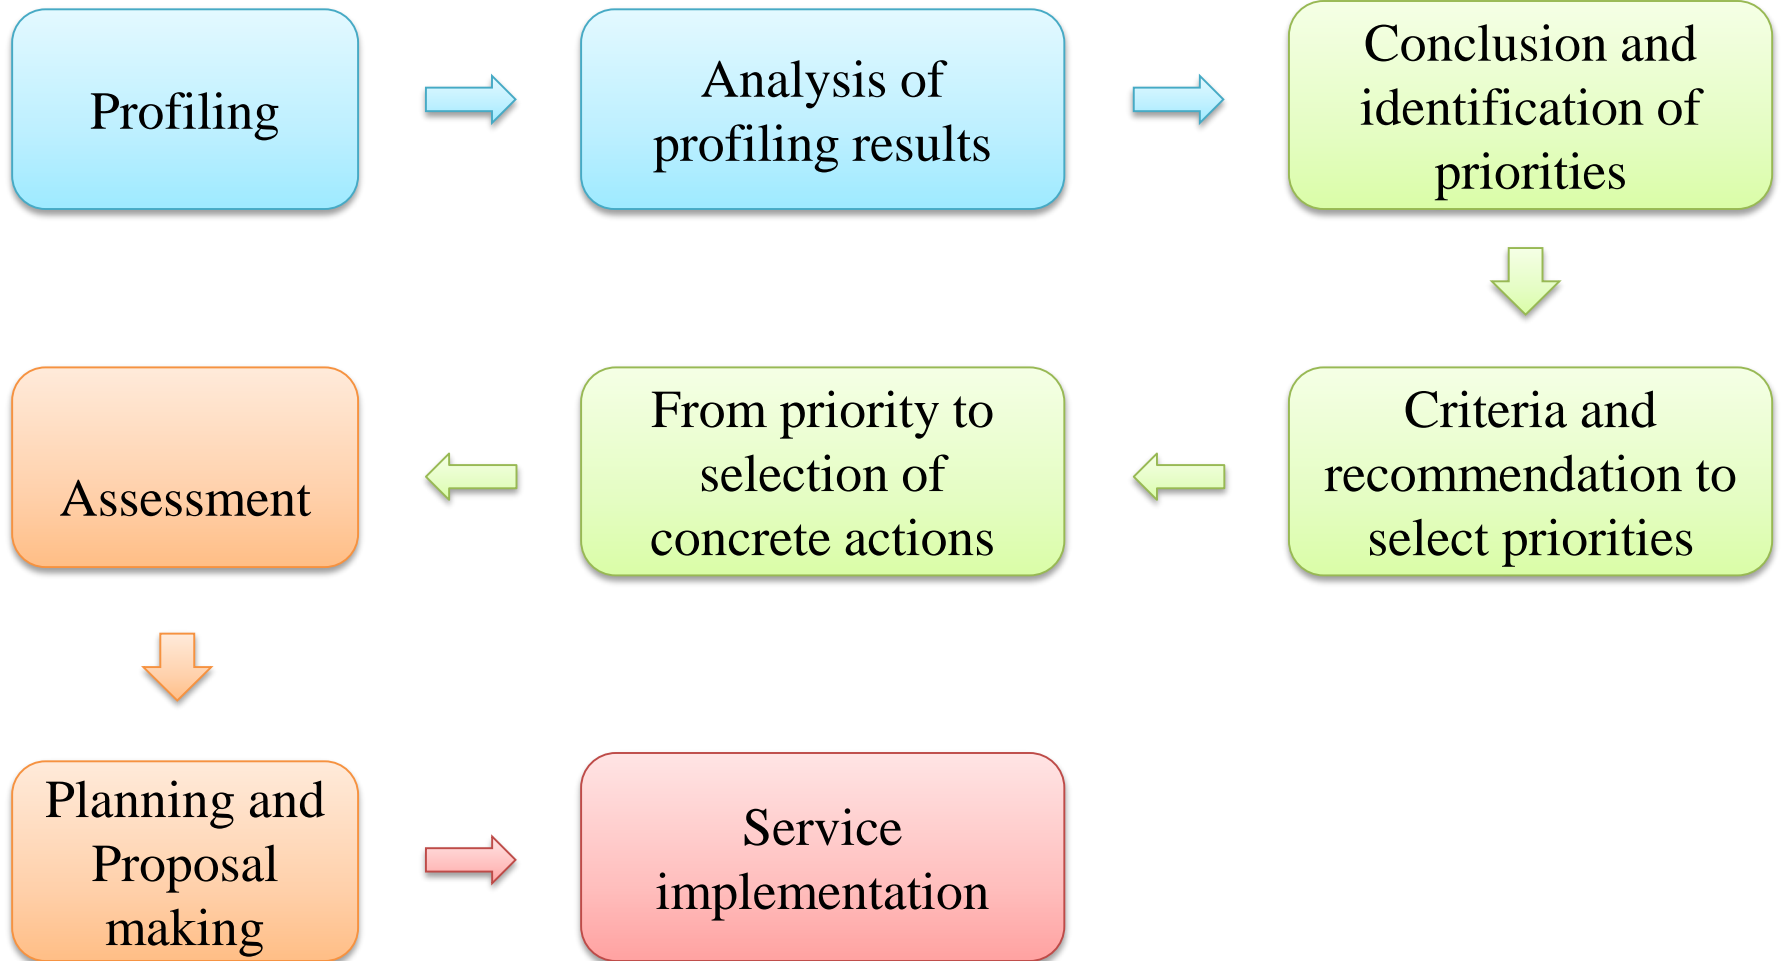

B. Commission Heads Survey

C. Focus Group Discussion

2. Secondary Data

Collection of Information from government and non-government offices and researches from websites

The Process

Achievements

Consultation and Preparation Meetings
